DANSVILLE'S PIONEER WHOLESALE NURSERIES

1913   Dansville, New York

The large photograph represents our new and modern packing plant. The small one shows our packing house used in 1882.
Quality Trees and **Honest Treatment** account for our wonderful growth.

We Employ No Agents

Buying Direct from Us Through Our Catalogue

YOU SAVE THE MIDDLEMAN'S PROFIT

In presenting this, our annual Wholesale Catalogue, to our patrons and friends we desire to extend our thanks and appreciation for your most liberal patronage in the past, and assure you of our appreciation for your continued patronage which we hope to merit by serving you in our usual prompt and careful painstaking manner.

We want to thank the hundreds and thousands of people for the many fine letters of testimonials about our trees, the manner of packing and so forth. While we are the Pioneer Wholesale Nurserymen of Dansville it is due to your appreciation of good stock and your co-operation in recommending our trees to your neighbors for all of which we are very grateful.

In 1882 we started to grow nursery stock for the planter and sell through the medium of a catalogue; that year we set out 3,000 seedlings. In the spring of 1912 we planted 1,700,000 seedlings, a most phenomenal growth indeed, simply due to the quality of our trees and the prices of same.

Today we can sell you a first class tree cheaper than ever, because from our years of experience we are equipped with modern and up-to-date facilities so that it does not cost nearly as much to grow a tree now as it did a few years ago.

Mr. Maloney wishes for a short talk to you. Listen, won't you agree that the time to buy your requirements is when you see them offered at reasonable prices by a reliable and responsible firm?

We offer no discounts for we have figured our prices at a close margin and we think you will agree they are at a "Live and let live" figure—they are from 3c. to 5c. per tree cheaper than our competitors.

For every dollar you place with us we will give you value received. If, through an error, anything comes to you that is not right, we will make it right. We want you to feel and to know that we will give you a square deal, can furnish you quality trees and save you money.

We have endeavored through this catalogue to give you a brief description of varieties, suggesting the soil on which they will succeed best and various other matters that will be beneficial to you in planting and caring for your trees.

We expect a big demand for apple and peach especially, and we would recommend to you the advisability of ordering early. Send your order during the winter, if possible, and pay in the spring.

References: We want you to write to any of the following as to our reliability or responsibility:

Citizens Bank, Dansville, N. Y.

Merchants and Farmers' National Bank, Dansville, N. Y.

R. G. Dun & Bradstreet Mercantile Agencies.

Parties whose testimonials appear in our catalogue or any business house in Dansville.

We want to serve you because we give personal attention to each and every order, and you may depend that you will be well served for we guarantee satisfaction or refund your money. We know there is no better stock in the United States than what we have to offer this season. We know our trees are right and we want you to know it and the only way we can convince you is to send us your order. We must have treated people right or we could not have made the rapid growth we have.

Confidence of our customers has been won by sending exactly what they order, true to name and up-to-grade trees and plants. To our patrons our trees need no introduction; to those unacquainted we can only say a trial order will prove their value.

Our Trees are grown at an elevation of 1500 ft. They are hardy, healthy and thrifty, propagated from bearing orchards.

We guarantee our trees to be free from scale and disease.

We guarantee that with our superior packing methods they will reach patrons in good condition.

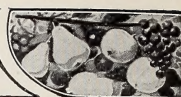

We guarantee our trees to be true to name: first, because they are, as mentioned above, budded from selected bearing trees; second, our Mr. A. E. Maloney cuts every scion for budding and giving his personal attention to this work, we feel that if you can get trees true to name anywhere in the country it is from Maloney Bros. & Wells Co. While we exercise the greatest care to have our varieties genuine we agree to replace on proper proof all that may prove untrue to name and it is hereby mutually agreed that our replacing or offering to replace shall operate as a liquidation of all damages.

Rates: We allow ten rates on lots of five or more, and hundred rates on lots of fifty or more. It does not matter how the number is made up; it may consist of such as 25 Pear, 15 Apple, 20 Cherry.

Terms: Cash with order except in large orders when satisfactory reference is given and then the order must be accompanied by one-fourth cash.

How Best to Remit

Remit by Bank Draft, Express Money Order, Post Office Money Order or Registered Letter. We will ship trees and plants C. O. D. providing 25% of the total of your order is sent in cash. If the order goes by express you pay the balance to your express agent upon arrival. If the order goes by freight you pay the balance at your bank, where you will also find freight bill and order on your freight agent to deliver shipment to you.

Freight and Express Rates

Don't let the Nursery Agent tell you that the freight on your trees will cost as much as the difference between his price and ours. It is absurd. The rate is between 20c and 40c per 100 lbs. west of the Atlantic and east of the Mississippi. First class trees will average 1 lb. each. At the maximum 40c per 100 lbs., it simply means you are paying less than one-half cent per tree for freight. Tell this to the Nursery Agent and see how he likes it. If he disputes these figures, call up your nearest R. R. Agent.

The Express rates you will also find much lower than you anticipate, as the Express Companies now carry trees and plants to any part of the country at a reduction of 20 per cent from regular merchandise rates.

Boxing and Packing Free

We box and pack all shipments without charge. All orders are put up in boxes or bales, lined with heavy paper to guard against stock drying out; the trees and plants are packed in moist excelsior and straw.

STATE OF NEW YORK DEPARTMENT OF AGRICULTURE Certificate of Inspection of Nursery Stock

This is to Certify that the stock in the nursery of Maloney Bros. & Wells Co., of Danville, County of Livingston, State of New York, was duly examined in compliance with the provisions of Section 305 of the Agricultural Law and it was found to be apparently free from any contagious or infectious disease or diseases, or the San Jose Scale or other dangerously injurious insect pest or pests. This certificate expires September 1st, 1913. Dated, Albany, N. Y., September 3, 1912.

No. 1089,

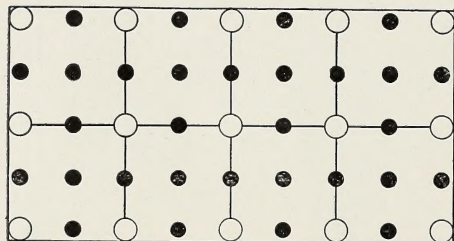

CALVIN J. HUSON, Commissioner of Agriculture.

Number of Trees or Plants on an Acre

3 feet each way 4,840	8 feet each way 680	16 feet each way 170	30 feet each way 48
4 " " " 2,723	10 " " " 430	18 " " " 135	35 " " " 40
5 " " " 1,742	12 " " " 305	20 " " " 110	40 " " " 28

Suitable Distances for Planting

Apples, Standard, 30 to 40 feet	Cherries, Sour, 15 to 18 feet	Raspberries, 3 to 4 feet
Apples, Dwarf, 8 to 10 feet	Plums, 16 to 20 feet	Blackberries, 5 to 7 feet
Pears, Standard, 18 to 20 feet	Quinces, 10 to 12 feet	Strawberries, 1½ by 1½ feet
Pears, Dwarf, 10 feet	Grapes, 8 to 10 feet	Asparagus, in beds, 1 by 1½ feet
Peaches & Apricots, 16 to 18 feet	Currants, 3 to 4 feet	Asparagus, in field, 1 by 3 feet
Cherries, Sweet, 18 to 20 feet	Gooseberries, 3 to 4 feet	

system you can plant 28 standards and 82 fillers per acre. The standard varieties will not require the full space until the 18th to 20th year, consequently you can see that fillers are a very profitable investment.

Transplanting Directions

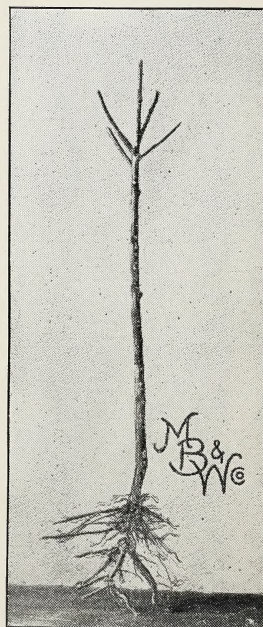

Preparing the Soil: First of all select a good field of rich soil. Should it be a meadow that you desire to plant, be sure and plow it during late fall so that the sod will decay and thereby furnish a certain nourishment that is very essential to the success of the trees. Clover sod will give best results.

Pruning the Tree is a matter of great consequence. The illustration here shows the correct way to trim trees for planting, do not be afraid that you are pruning too severely for you are not; this is the proper way for best results.

Planting: Make the holes large enough to admit the roots without cramping and deep enough to bring the tree to its natural depth. Always use the surface soil to cover the roots. When the hole is half full, tread firmly and then fill the hole and tread again. If you tramp the earth firmly about the roots you will not lose one tree out of every five hundred.

Way to Lay Out an Apple Orchard

There are different ways to lay out orchards. The plan shown here is one that is adopted by most planters. The open circle represents the Standard varieties, 40 ft. each way and the dots, fillers, 20 ft. each way. Under this

Peaches

Price of all Varieties of Peach Trees

			EACH	TEN	HUNDRED
Largest Size	5 to 7 Feet	XXX	.15	\$1.25	\$12.00
Medium Size	4 to 5 Feet	XX	.12	1.00	8.50
Smaller Size	3 to 4 Feet	X	.10	.75	6.50

Peach Growing is Today a Great Industry, in all probability more peaches are being planted annually than any other fruit. The comparative ease with which Peach trees may be cultivated, their freedom from disease, the short period before they come into bearing, together with the wonderful demand for the fruit, and the facility with which it may be shipped to markets, make peach growing extremely profitable.

Here is the Important Question that Confronts Every Planter: Where are the peaches that you buy propagated? On some low land that will throw up a big, soft, spongy tree that will freeze out the first cold winter and just when you ought to have a good crop you find your fruit buds are killed? Or are they raised on the upland where they make a strong, hardy, healthy, vigorous growth?

Our Peaches are propagated on the upland at an elevation of 1,500 feet, therefore are absolutely hardy and proof against severe winters. **Our peach pits** are gathered in the mountains of North and South Carolina, where disease is unknown. These two facts prove beyond question of doubt why it is decidedly advantageous to plant Maloney Quality peach trees for best results.

Soil. Peach trees will succeed on any kind of rich soil, but will not thrive on clay, nor damp, low land.

Care of Peach Trees: To keep your trees in a healthy and vigorous state, that will insure good crops, you must keep your ground clean and mellow by harrowing. An occasional dressing of wood ashes will be very beneficial. Do your pruning in the spring. Cut out all dead and useless wood, thereby letting in the necessary light and air to give the fruit color.

Bridgeport, Conn., Oct. 28, 1912.

MALONEY BROS. & WELLS CO.,

Gentlemen: Stock you shipped to me arrived in good condition, and I was more than pleased with it. Trees of the same quality could not be purchased here for triple what it cost to get them from you, including expressage.

Yours very truly,
H. GILBERT KNOX.

ELBERTA

Elberta. The leader of all peaches and the greatest commercial variety on the market; 50 per cent of the peaches planted are Elberta. In all probability no peach will succeed over so wide a range of territory as this kind. It will thrive where any peach can be grown. A beautiful peach of good quality, not only the best orchard variety, but also valuable for planting in the garden. Elberta is hardier in bud than many varieties, therefore a more uniform cropper. It is large, yellow, with red cheek, juicy and high flavor; flesh yellow, free stone. Season medium early, following quick upon Early Crawford. Early Sept.

Kalamazoo. Large, golden yellow, with crimson cheek; flesh thick yellow, superb quality, small pit. Strong grower, early bearer hardy and productive. First of Sept.

Chair's Choice. Has no superior in quality and flavor, and for profit is without a rival; large, yellow, free, rich in color, flesh very firm, ripens after Smock; great bearer. Oct.

Crawford's Early. A magnificent large, yellow peach, of good quality. Tree vigorous and very productive. Its fine size, beauty

and productiveness make it one of the most popular sorts: no other variety has been so extensively planted. First of Sept.

Foster. Large, deep orange red, becoming very dark red on the sunny side; flesh yellow, very rich and juicy, with sub-acid flavor; earlier than Early Crawford; very handsome. Last of Aug.

Engle's Mammoth. Large, round, suture slight; yellow with red cheek; flesh yellow, stone small, free; sweet, rich, juicy. Sept.

Fitzgerald. It is one of the hardiest peaches, both in bloom and tree; very prolific, large size. First of Sept.

Early Rivers. Large, light straw color with delicate pink cheek; flesh juicy and melting. Early Aug.

Crawford's Late. Fruit of large size; skin yellow, or greenish yellow, with dull red cheek; flesh yellow; tree vigorous, moderately productive. Last of Sept.

Yellow St. John. One of the best of the early yellow varieties. Of medium size, orange yellow with a red blush on sunny side, flesh tender, juicy and quality very good. Aug. 15th.

DANSVILLE'S PIONEER WHOLESALE NURSERIES

Niagara. One of the best peaches that has been introduced for many years past. There are many commercial orchards that are now bearing, not only in New York, but in other states as well. They are doing splendidly. The tree is hardy and healthy in leaf and bud and bears abundantly. Fruit large, oval, yellow with brilliant red cheek. The stone parts freely from the flesh. Flavor, rich and delicious, far ahead of Elberta in this respect. It is indeed a rival for this famous peach. Season is medium early, coming in just before Elberta, overlapping it one week. If you intend planting peaches, you will make no mistake in setting Niagara. Last of Aug.

Carman. Fruit large, color creamy white or pale yellow with deep blush; flesh tender, fine flavor and quite juicy; one of the hardiest. Ripens with Early Rivers. Early Aug.

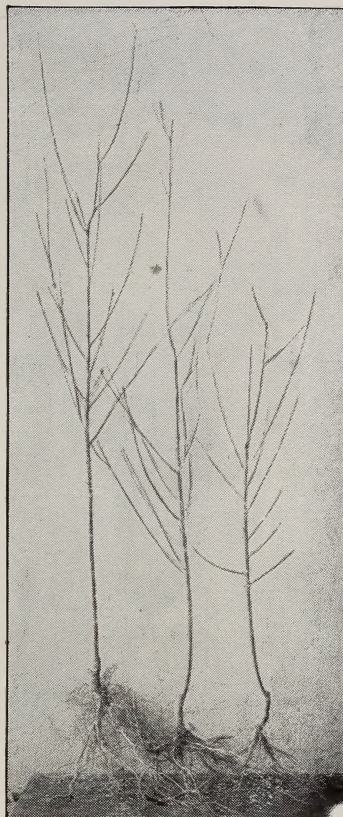

Crosby. Medium size; bright orange yellow streaked with carmine. One of the best standard market sorts. First of Sept.

Triumph. Earliest yellow-flesh peach, with good eating and shipping qualities, sure and abundant bearer; strong, vigorous grower. First of Aug.

Smock Free (Beers' Smock.) Fruit large; oval; skin orange yellow, mottled with red; a good market sort. Last of Sept.

Greensboro. A valuable variety; color greenish-white, shaded and splashed with dark red, very hardy and not so subject to rot as are most early varieties. Early Aug.

Champion. Fruit large, beautiful in appearance; flavor delicious, skin creamy white, with red cheek; freestone. Tree hardy and prolific. One of the best. Aug.

Have You Started an Apple Orchard? If not, we want you to ask yourself why. Observe what your neighbor is reaping from the orchard set a few years ago. Remember, we are all advancing in years and each and every one trying to arrange our business affairs so that in our old days, we will have sufficient to care for our necessities.

Apple Orchard a Safe Investment. Statistics show that there is no better investment than in an orchard of the *King of fruits, the apple*, for, after the fifth or sixth year, it requires but little attention and you have an annual income that insures you an easy living for the remainder of your days.

Soil and Climatic Conditions. Apple trees will do well on most any kind of soil, and under the most severe climatic conditions. However, your success depends on the care given, cultivation and spraying at the proper time being most essential.

Selection of Varieties. By judicious selection of varieties a constant succession can be obtained so that you will have apples continuously throughout the entire year. "Nothing more healthful in the home than the apple."

Why Are Planters More Successful with Maloney Quality Trees? Because we aim from the very beginning to give our patrons the most that can be had for the money. Too many Nurserymen economize by propagating on Western grown seedlings. No Nurseryman can conscientiously do this for he well knows that Western seedlings are more or less troubled with that harmful crown and root gall. We eliminate this feature by importing our seedlings from France. Any of your Inspectors will tell you that trees so propagated are longer lived and will net you greater returns. It is not so surprising after all that *Maloney Quality Trees* are being planted by thousands in every state in the Union east of the Rockies. Following is the List we have to offer this season.

DANSVILLE'S PIONEER WHOLESALE NURSERIES

Summer and Autumn Apples

Early Harvest. Medium to large size; pale yellow; tender, with a mild, fine flavor. Tree an erect grower and a good bearer; excellent for orchard and garden; one of the first to ripen. Middle to end of August.

Yellow Transparent. Medium size, roundish, oblate, slightly conical; skin pale yellow when fully matured; flesh tender, juicy, sprightly, sub-acid; good. August.

Red Astrachan. Tree hardy and regular bearer, a very vigorous grower; fruit large, roundish, nearly covered with deep crimson overspread with a thick bloom; juicy, rich and beautiful. This fruit commands the best price of all the summer varieties. July and August.

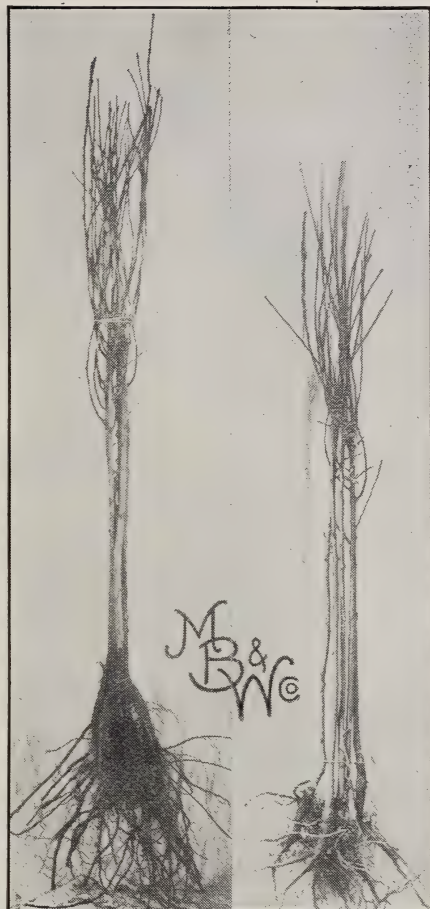

Golden Sweet. Large, pale yellow, tree a good grower and very productive. August to September.

Pound Sweet (Pumpkin Sweet.) A very large, round, yellow russet apple, very sweet and rich. Tree a vigorous, rapid, upright grower; valuable. October and November.

Gravenstein. An attractive and excellent quality apple. Fruit large and uniform in size, skin thin, tender, greenish yellow overlaid with dark red. Sept. to Nov.

Maiden's Blush. Large, flat; pale yellow with a red cheek; beautiful; tender and pleasant, but not high flavored. Tree an erect grower, and a good bearer. A valuable market apple. September and October.

Duchess of Oldenburg. A large, beautiful Russian apple; roundish; streaked red and yellow; tender, juicy, pleasant; a kitchen apple of best quality. Tree a vigorous, fine grower, and an abundant bearer. The hardest fall apple. We find Duchess the most valuable commercial variety, free from blight, a sure cropper, hardy as an oak, and all in all a wonderful variety. August and September.

TWO YEAR APPLE TREES
6 to 7 Ft. 5 to 6 Ft.

DUCHESS OF OLDENBURG

Alexander. Of Russian origin. Large; deep red or crimson; flesh yellowish white, crisp, tender, with pleasant flavor. Tree very hardy. October.

Fall Pippin. Very large, yellow, tender, juicy and rich. Fine in all localities; tree vigorous. September and October.

Fameuse (Snow Apple.) Medium size; deep crimson; flesh snowy white, melting and delicious, one of the finest desert fruits and valuable for market; a good baking apple. This variety succeeds over a very wide range of territory; tree hardy and vigorous; an annual cropper. October to December.

Autumn Strawberry. Medium, streaked, tender, juicy, fine, vigorous and productive. September to October.

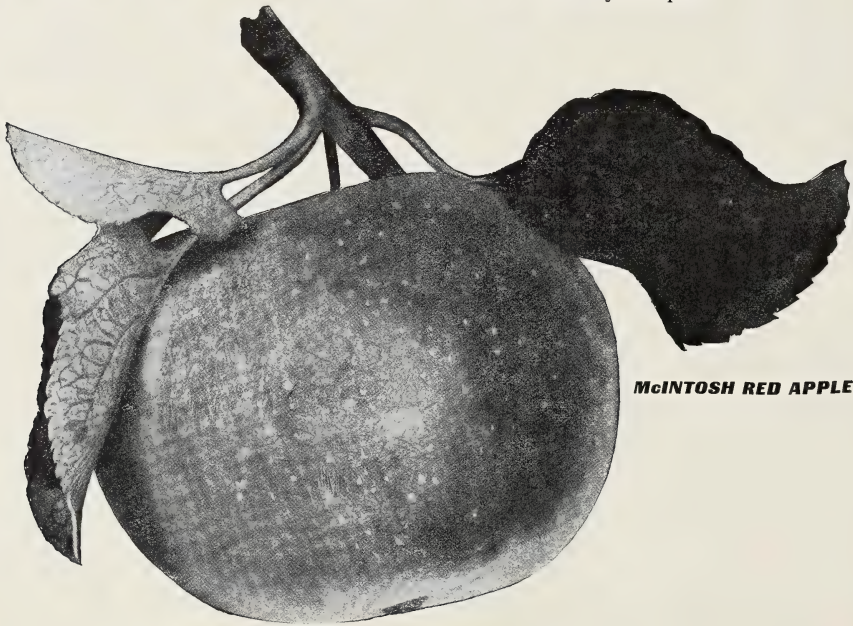

Winter Apples

Baldwin. This is the leading commercial variety in the American markets. It is to apples what Elberta is to peaches and Montmorency is to cherries. One of the best storage apples for export trade. Thousands of barrels of this fruit are exported to England annually. Baldwin is planted extensively and succeeds wonderfully well in all states east of the Mississippi. No variety yields larger crops, bears shipment better or is more attractive in color, size and shape. It is highly esteemed for an eating and cooking apple. Fruit large, bright red, crisp, juicy and rich. Trees vigorous, upright and productive. For a commercial orchard, it can be relied upon. If ever in doubt what kind of apples to plant, select Baldwin. Dec. to Mar.

McIntosh Red. An exceedingly valuable, hardy, attractive apple; good size, nearly covered with red. Flesh white, fine, very tender, juicy and refreshing. Tree hardy, vigorous, a good annual bear—comes into fruiting early, yielding large crops. Mr. Maloney recommends this variety to our patrons as one of the best used as a filler. The hardiness of both trees and fruit and its great early bearing qualities, coupled with its elegant color and splendid flavor, makes it a most valuable apple. Oct. to Jan.

Grimes' Golden. Medium to large size; skin golden yellow, sprinkled with gray dots; flesh crisp, tender, juicy, sprightly, very good to best. Grown in the South and Southwest. January to April.

McINTOSH RED APPLE

Wealthy Apple. A patron writes that from 450 Wealthy apple trees five years planted, he sold \$600.00 worth of fruit, some trees yielding a barrel of apples. From one tree four years old he picked three bushels of apples. Wealthy is one of the best red early winter apples. Owing to its early bearing qualities it is planted largely as a filler. Its extreme hardiness makes it a valuable variety for the Eastern States and is considered to be one of the best all around early winter apples to grow. Fruit large, roundish; skin smooth, oily, covered with a dark red. Flesh white, tender, juicy, vinous, sub-acid; quality very good. The variety is particularly valuable for cold climates because the tree is very hardy. Wealthy is being planted largely for commercial purposes as a filler in many sections. Oct. to Jan.

Jonathan. A beautiful red apple, highly flavored and of excellent quality, being tender, juicy, spicy, and rich—a splendid family sort and highly profitable for market. Tree long-lived, productive, and an early bearer. Nov. to Jan.

Hubbardston. (Hubbardston Nonsuch.) Large; striped yellow and red; tender, juicy and fine; great bearer. One of the best. Nov. to May.

Sutton Beauty. Tree vigorous, upright, spreading, fruit uniform in size and shape, fine grained, crisp, tender, very good. Color bright red striped with carmine. Nov. to Mar.

Rhode Island Greening. Known everywhere. This large and superior winter apple is famous over a large extent of country, and is more highly prized for cooking and eating than any other variety. It is a good keeper but will keep better if picked early. This Greening is a beautiful yellow color when ripe, and is a most abundant yielder. Dec. to April.

Northern Spy. A hardy, red winter apple, a vigorous and healthy grower, forming an upright tree of large size quicker than most varieties. It has no superior for beauty and quality. When at its best it is of large size and an abundant bearer, and a good keeper. Dec. to Feb.

DANSVILLE'S PIONEER WHOLESALE NURSERIES

King (King of Tompkins Co.) When you see in the market apples of extraordinary size, beautiful red in color, specimens that attract the attention of everybody who passes by, you may know that these are the King apple, an appropriate name since it is of the largest size and possessed of the greatest beauty. The market is never fully supplied with this variety, since its size and beauty make it in great demand. Tree a vigorous grower, good bearer and hardy. Nov. to Jan.

Fallawater. Very large, yellow with dull red cheek, juicy, crisp, pleasant, sub-acid, very productive. Dec. to Apr.

Boiken. Annual bearer, vigorous grower. Fair size, hardy; bears young, very attractive and regarded as one of the most valuable apples of recent introductions. Nov. to Mar.

Paragon. Late keeper, large of good color and quality, very productive. Dec. to May.

Bailey Sweet. A beautiful red apple of good quality. Oct. to Jan.

Wolf River. Fruit is very large, some specimens weighing 27 ounces, flattened, conical, highly colored. An excellent cooking apple. Sept. to Dec.

York Imperial. This is a fine, hardy, large, red, winter apple. It succeeds over a wide range of country. It comes into bearing at four years from planting, bears regularly and heavily. The foliage and fruit are remarkably free from scab. The fruit is of medium size, skin yellow and almost wholly covered with two shades of red, the darker one disposed in distinct stripes. A good shipper, bringing highest prices. H. W. Anderson, Pa., writes that he has a York Imperial apple tree thirteen years old that produced seventeen bushels and another older tree fifty-one bushels the past season. A leading variety for Pa. Nov. to Feb.

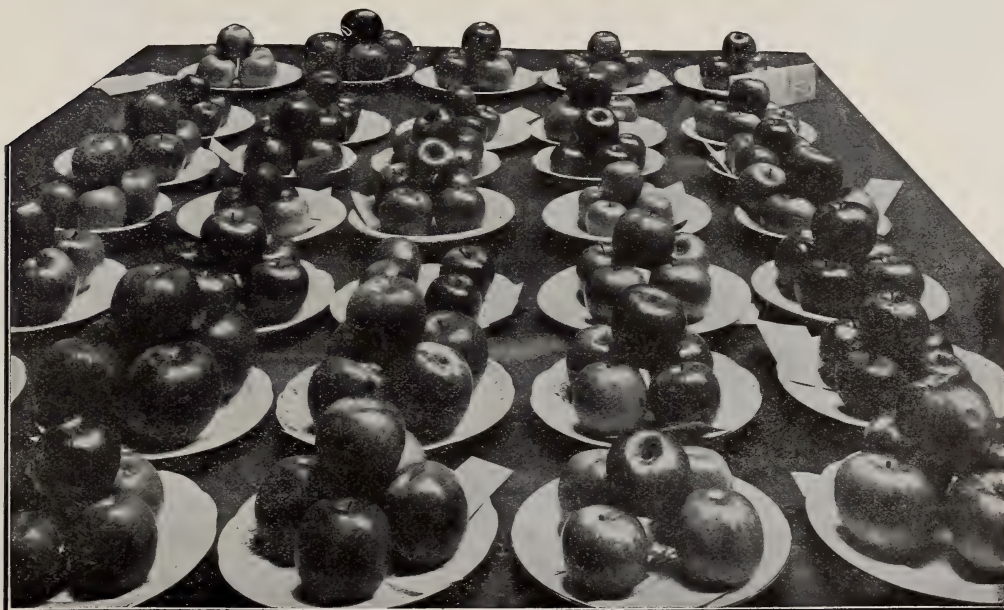

WAGENER

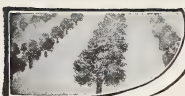

Wagener (Red Winter Apple). Wagener is one of the most beautiful winter apples ever grown. It is of the highest quality, the flesh being crisp, tender and aromatic. We know of no apple possessing greater beauty or of finer quality than the Wagener. It succeeds well East and West. No orchardists' list of varieties can be complete without this beautiful and superior flavored apple. Of medium to large size; flesh firm, sub-acid and fine quality. Dec. to May.

Yellow Bellflower. Adapted to the northern and middle states; highly esteemed for its excellent dessert qualities. Oct. to Feb.

Mammoth Black Twig. Resembles a large Winesap. Dark red. A very profitable variety to plant for market. It is productive and a long keeper. If a late winter apple is desired you will make no mistake in adding it to your list. Dec. to April.

YORK IMPERIAL APPLES—Taken at a recent Pennsylvania Fruit Exhibit

Maloney Bros. & Wells Co.

DANVILLE N. Y.

Winter Banana. Fruit large size, perfect in form; golden yellow, and beautifully shaded and marbled with bright, crimson red; flesh lemon-yellow, fine grained, sub-acid, rich, aromatic flavor, and of the highest quality. A good keeper. Tree remarkably strong grower, and on account of its great hardiness, will thrive in any climate. Its early bearing is something simply wonderful, generally producing a fine crop the second year. A valuable market variety. November to January.

Rambo. Fine in nearly all localities. Streaked and marbled with dull yellowish red on pale yellowish ground. Nov. to Mar.

Stark. Large, striped, mild sub-acid, good. Valuable as a keeper. Jan. to May.

Baxter. A large, red apple, decidedly attractive in appearance; vigorous and productive. Nov. to Jan.

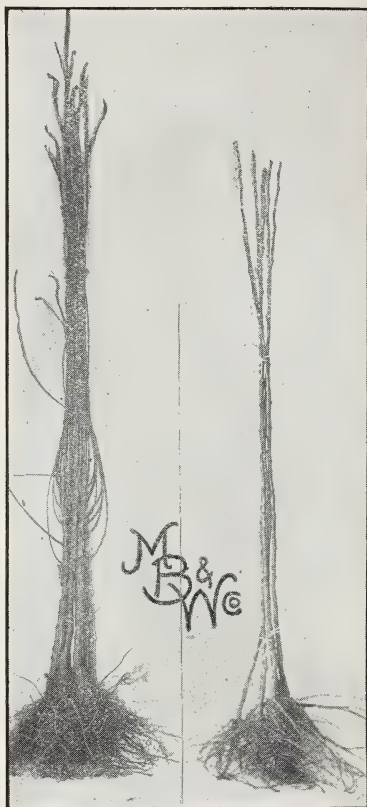

Smith Cider. Valued for its hardiness, productiveness and handsome fruit, red on pale greenish yellow. Nov. to Mar.

Winesap. Large, roundish, oblong; deep red color, with a few streaks and a little yellow ground appearing on the shady side; flesh yellow, firm, crisp, with a rich, high flavor; quality very good, and highly esteemed in the South and Southwest. Dec. to May.

Northwestern Greening. A round, large attractive, greenish yellow apple; flesh fine grained, juicy, firm, good quality; splendid keeper; ships well, hardier than R. I. Greening and on that account considered valuable for districts where the climate is too severe for the R. I. Greening, as it has stood the most trying tests and found equal to Wealthy in point of hardiness; especially good for planting in the Middle Atlantic and New England States. Oct. to Apr.

This past season Mr. Edwin C. Tyson, of Flora Dale, Pa., sold \$960.00 worth of apples from 54 trees that five years ago he started to pull out.

Stayman Winesap. Tree vigorous, hardy, spreading. An early bearer and very productive; fruit medium size, round, approaching

ONE YEAR APPLE TREES

Large 4-6 Feet

Small 3-4 Feet

conic; skin smooth, greenish yellow, splashed and striped with red and purple; flesh yellow, firm, tender, juicy, rich, sub-acid, aromatic, quality best. Splendid late keeper. Dec. to May.

Smokehouse. A very pleasant flavored dessert apple. Tree a vigorous grower healthy, hardy and reliable cropper. Fruit of medium to large, uniform size and shape. Color yellow or greenish, mottled with rather dark red, sometimes deepening to a solid bright red. Oct. to Mar.

Walker Beauty. Tree a good grower, bears young, very productive, fruit attractive in color. Nov. to Apr.

Seek No Further (Westfield). An old favorite dessert apple. Oct. to Feb.

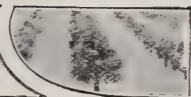

STAYMAN WINESAP

You Save 50 per cent
by dealing Direct
with us, the Growers

DANSVILLE'S PIONEER WHOLESALE NURSERIES

American Blush. (High Quality Red Winter Apple.) Here is an apple that is not surpassed the world over for large size, great beauty of color, or for excellent quality. It is an apple that should be grown in every garden and orchard. Fruit large, roundish; color bright red on yellow skin; flesh yellow with a fine, rich, aromatic flavor, sub-acid. The tree is a vigorous grower, and is exceedingly productive, bearing an abundant crop of fruit every year. November to January.

Salome. Long keeping, annual bearer, firm, fine grained, tender very good. Nov. to Mar.

Bismarck. An attractive apple in color and shape, the skin being a bright yellow, covered with bright carmine. The fruit is of large size, specimens having been grown weighing nearly two pounds each. The flesh is yellow, tender, juicy and of good quality. Nov. to Feb.

Roxbury Russet. Medium to large. Surface rough, greenish covered with russet. Tree free grower, spreading; a great bearer. Keeps until June. Its great popularity is its productiveness and long keeping. Dec. to May.

Ben Davis Apple is hardy and attractive, succeeds wherever apples are grown. There is no apple that has more favors on account of its hardiness, productiveness, beauty and endurance in shipping. It is excellent for cooking. There are better apples but where Ben Davis succeeds one can always be sure of success, owing to its regular and heavy bearing qualities. The fruit is thick-skinned, does not show bruises easily, and presents a good appearance in the package after being handled and shipped in the ordinary way. November to April.

ROME BEAUTY

A Satisfied Patron

Binghamton, N. Y., May 6, 1912.

GENTLEMEN:—

I have just returned from the farm where we planted the 4000 apple trees recently purchased from you. I am much pleased with the condition of these trees. Our horticulturist in charge states that they are all unusually fine trees, with exceptionally fine roots.

I desire to express my appreciation of the way in which you filled our order.

Very truly yours,
CHAS. R. STEWART.

Rome Beauty.

A large and handsome apple almost entirely covered with bright red; of high quality. The flesh is tender, juicy and highly flavored. It is a popular apple over a wide range of country and is recognized as one of the leading commercial varieties. Dec. to Mar.

Spitzenburg (Esopus.)

Unequaled for its high rich flavor, color deep red; flesh yellow, crisp, rich and excellent. Dec. to Mar.

Gilliflower. (Black). An old dessert apple; tree a good vigorous grower and a reliable cropper. Oct. to Feb.

Twenty Ounce. Very large, yellow striped, red, fine quality apple; good keeper. Tree vigorous grower, productive. Oct. to Jan.

Tolman Sweet. Medium size; color, light yellow; flesh white, firm, rich, and very sweet. Excellent for winter baking. This is the old favorite, highly prized for baking, etc. Productive, an early bearer, long keeper. Nov. to Apr.

Gano. An improved Ben Davis, adding to the good qualities of that variety a much handsomer fruit of deep, dark red, that brings a ready sale in market. Dec. to Mar.

Best Hardy Crab Apples

Hyslop. Fruit large, deep crimson; produced in clusters; flesh yellow, sub-acid; good for cider and culinary purposes; popular on account of its large size, beauty and hardiness. Oct.

Whitney. Large, greenish striped with carmine; flesh firm, juicy, rich. Last of August.

General Grant. Large, round, yellow, covered with stripes of red, and when exposed to the sun, turning quite dark; flesh white, fine grained, a good grower, hardy and productive. Sept.

Transcendent Crab Apple. This is probably one of the best of all crab apples, is popular over the entire country. It is perfectly hardy everywhere and an immense bearer, yielding large crops every year. It is also a rapid grower and often bears fruit three years after planting. The fruit of this crab is held in great esteem by housewives for making jelly, pickles and preserves. The fruit is 1½ to 2 inches in diameter, bright yellow, striped with red; excellent for culinary use. Immensely productive. Sept. to Oct.

Dwarfs

WILDER DWARF

Dwarf fruit trees bear larger, better fruit, bear several years earlier, and produce more returns for a given space than standard trees. This is all true and there are even more important points. The low, broad heads are within reach, so that apples or pears can be easily picked. You can plant dwarf trees in your garden and still grow strawberries and most vegetables. With dwarfs some varieties will bear the first year, all will the second year and bear a full crop the fourth year.

You can plant forty trees in a small space, save several years,
get better fruit and each tree should bear a bushel a year.

We offer the best trees budded on Paradise or Doucin stocks. They will succeed in many places where standard trees fail. In a word, they are the kind of Dwarf trees that will put their strength into fruit instead of wood. To insure best selection of varieties order at once since our supply is limited.

Cherry growing is one phase of orcharding to which Mr. Maloney wishes to call your personal attention. That planting of cherry trees in the past has been neglected, is a fact. There is as big a demand as ever for cherry fruit—the supply does not begin to satisfy more than one-half of the demand. Canneries are being started wherever there are good cherry orchards. It is easy to dispose of your fruit, and it is one of the most profitable fruits under cultivation. Enormous profits are being realized from young orchards, for they come into bearing at an early age and yield abundantly.

Requires Least Attention of all Fruits, because it has been demonstrated beyond question of doubt that scale cannot live on cherry.

Our Cherries are Equipped with a most beautiful fibrous root system due, principally, to our top dressing them with a fine grade of fertilizer when buds were dormant. Cherry growing is a specialty with us, for we have made it a study for years and the trees we have to offer this season, we firmly believe have attained the highest grade of perfection.

Where to Plant—on any kind of land, other than wet. They will thrive beautifully on a sandy or gravelly soil.

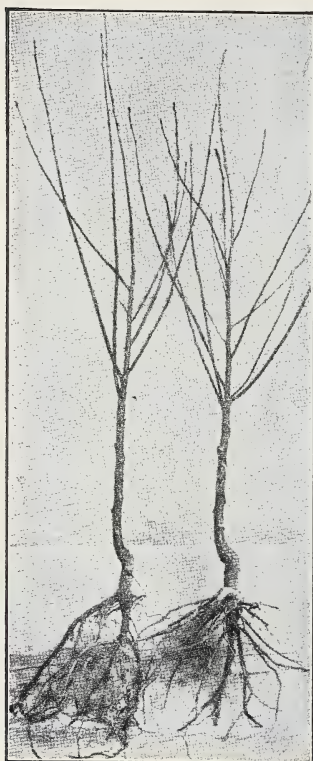

How to Plant. For your information cherry roots must not be given much sun or wind exposure—either are just as harmful as a heavy frost. You would not think of leaving them out over night uncovered. It is just exactly as necessary to protect them from sun and wind. The proper way is to keep the trees covered with a blanket or canvas while planting.

Schenectady, N. Y., Apr. 29, 1912

MALONEY BROS. & WELLS Co.,

Gentlemen: The stock ordered arrived in fine condition. Very much pleased with the quality of goods and must give you credit for shipping goods in such first class manner. Everything arrived in good condition.

Very respectfully,
Horace J. Trego

Two of Our Extra Size Sour Cherry Trees. Note Superior Root System.

Sour Cherries

Montmorency Hardy Cherry. A beautiful, large, red cherry; much larger and firmer than Early Richmond, and fully ten days later in ripening. Being extraordinarily prolific and very hardy, it can be recommended as a variety of great value. Valuable for canning and preserving. A patron writes that six years ago he planted fifty Montmorency cherry trees from which he has just harvested \$150 worth of fruit. One acre of Montmorency cherries, owned by a neighbor, has returned an average annuity of over \$600 for the last ten years. This cherry is in great favor wherever cherries are grown. With such a heavy demand for this variety, we would suggest that you order early. Last of June.

Large English Morello Cherry. Without doubt one of the most valuable of this class. Easily grown, generally producing a heavy crop. Fruit dark red, quality good, with a rich, acid flavor; late. Tree very hardy, for extremely cold latitudes. August.

Ostheim. A hardy Cherry from Russia. It has been tested in the severest winters of Minnesota, and has been found perfectly hardy. Fruit large. July 15th.

Dyehouse. A hardy and valuable cherry. The earliest cherry of fine quality. Often bears at two years old, and has the appearance of being covered with a purple cloth, such is the abundance of the fruit. Has the smallest pit of any cherry known. For tarts, pies, and especially for canning, it has no superiors among cherries. Early June.

Wragg. Much like English Morello. More productive and excels in size, yield and quality. One of the hardiest Cherries and has produced annual crops at the northernmost limit of Cherry culture. Aug.

Olivet. A new Duke of French origin. Unlike most others of this class, it is said to be very early and to ripen over a long period. Fruit very large. June.

May Duke. Large, red; juicy and rich; an old, excellent variety; vigorous, productive. June 15.

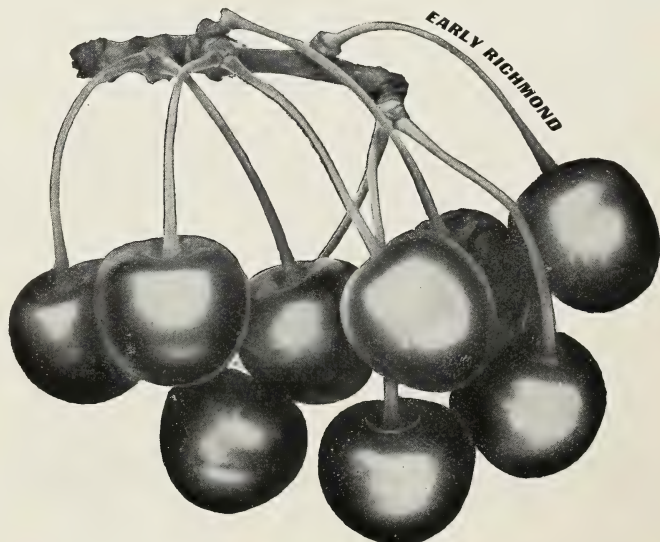

Early Richmond. This is one of the most valuable and popular cherries and is unsurpassed for cooking purposes. This hardy cherry fruits on young trees soon after planting. It

is the good old variety that yields such marvelous crops in the gardens. The most hardy of all varieties, uninjured by the coldest winters. Tree slender in growth, with a roundish spreading head exceedingly productive. Fruit is medium size, round and dark red. The flesh tender, juicy, and sub-acid. Ripens in June.

Louis Philippe. Large and beautiful fruit of blackish red, flesh tender, mildly acid, good to best. Mid-July.

Baldwin. Fruit very large almost round, dark red, slightly sub-acid, the sweetest and richest of the Morello type. Remarkable for earliness, quality, vigor, hardiness and productiveness. June.

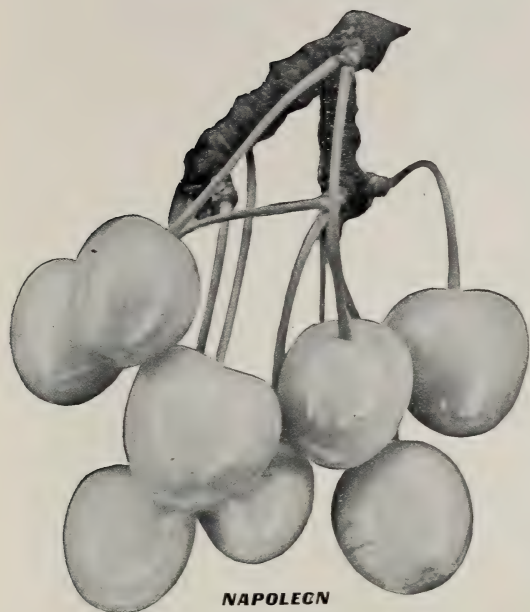

Vladimir. Hardy, strong grower, very productive, sub-acid, of excellent quality, juicy. July 15.

Sweet Cherries

NAPOLEON

Napoleon. Tree medium size, erect with roundish head, fruit borne generally in twos, very large oblong cordate, light lemon yellow with red cheeks in the sun. Flesh very hard, brittle, colorless, reddish at the stone. Good, excellent bearer. Ripe about June 20th.

Black Tartarian. This fine old variety produces immense crops of very large, purplish black fruits of mild, sweet, jelly-like consistency. The tree makes a beautiful, erect growth. Late June and early July.

Centennial. A large, light colored sweet cherry; flesh very firm thus making it one of the most valuable of the sweet varieties for shipping. Resembles Napoleon in appearance, of which it is a seedling, but it is larger and more oblate in form. Tree a handsome grower. Its sweetness is very pronounced, being exceedingly sugary. July.

Dikeman. Fruit large, black, firm, of excellent quality, fine keeper and shipper. Early Aug.

Windsor. A splendid, large, liver-colored Cherry that hangs a long time and rots but little. The flesh is remarkably firm and good, the tree very hardy and fruitful. Exceedingly valuable for late market and home use. July.

Yellow Spanish. Large, pale yellow, with red cheeks; firm, juicy and excellent, one of the best light-colored Cherries; vigorous and productive, Last of June.

Governor Wood. One of the best cherries; very large, light yellow, marbled with red; juicy, rich and delicious; tree healthy and a great bearer; hangs well on the tree; vigorous. Last of June.

Lambert Cherry. A fine sweet variety originating in Oregon, and one of the largest of all Cherries, dark purple red, turning almost jet black when ripe. Fresh, firm, rich, juicy, tree rugged, strong grower and an enormous bearer. The growing of the sweet Cherry is a great industry only fairly well begun. There is an enormous market for the fresh fruit and when canned or preserved the markets of the world are open to the producer. Late July.

Schmidt's Biggarreau. The fruit is of very large size, of a deep mahogany color. The flesh is dark, tender, very juicy, with a fine rich flavor. Fruit grows in clusters. It is an excellent shipper and brings good money on the market. July.

Bing Cherry. This valuable new black cherry succeeds everywhere. Tree very thrifty and upright grower, very hardy and productive, flesh very solid, flavor of the highest quality, a fine shipping and market variety. It is one of the most delicious sweet cherries. This valuable cherry should be followed by Lambert, which is later in ripening. Both are grand cherries. July.

Largest size	1 year	4 to 6 feet	XXX	.18	1.75	15.00

The planting of Pears is on the increase, so much so that it has been difficult for us to supply the demand. This is especially true of Bartlett, Clapp's, Kieffer and Seckel which are the leaders and in the order as named.

Succession of Varieties. By judicious selection of varieties, a constant succession can be obtained so that you will have pears continuously from July to early Spring.

Soil. Pears will succeed best in a clayey soil, although any good heavy soil will do, but avoid planting on sandy loam.

DANVILLE'S PIONEER WHOLESALE NURSERIES

Bartlett. Large, coloring when fully ripe to waxen yellow with red blush; juicy, melting, highly flavored, a most delicious fruit; tree bears early and abundantly. We have sold many large orchards of this variety. The fruit ripens just at a time when there is but little competition; in fact, there is no pear ripening at the same time that is in the Bartlett class. It might surprise you to know—nevertheless it is a fact—that there are more of this variety planted than all other kinds of pears combined; That speaks for itself, does it not? You will never make a mistake when planting Bartlett. Sept.

Our patron, J. B. B., Boise, Idaho, writes that last year, from his three acre pear orchard, he picked 850 boxes which sold in New York City for \$3,825.

Another patron, H. D. Bailey, Troy, N. Y., writes that he marketed 1000 barrels of pears which were sold for \$3,250, and that the product of his sixty acre farm in 1903 was \$7,200, and in 1904 \$7,400.

Beurre D' Anjou. This is one of the best known, most popular and profitable late pear. The tree is a vigorous grower, hardy and prolific. The pears are of large size, green in color, but often yellowing when thoroughly ripe. They are very juicy and luscious and of the best quality. For late fall and very early winter use, we have no better variety. Oct. to Jan.

Koonce. A very popular early variety. Fruit large, yellow, one-half nearly covered with red. Does not rot at the core. Tree vigorous, hardy and upright grower. Very productive and a good shipper. July.

Duchess D' Angouleme. A most dependable cropper, often fruiting the first season after planting. Fruit large, frequently weighing a pound. A dull greenish yellow, spotted russet, flesh white, rich and good quality. An all around profitable market pear. Oct. and Nov.

Beurre Clairgeau. Large; light yellow, shaded with crimson and russet. Flesh yellowish, melting. Free, early, abundant bearer. Nov. to Jan.

Lawrence. Medium to large, golden yellow, with melting, aromatic flesh. Unsurpassed as an early winter Pear. The tree is hardy, healthy and productive, bearing large crops annually. Nov. and Dec.

Kieffer. Large, rich golden yellow, sometimes tinted red on the sun-exposed side; fair quality, excellent for canning. It has become a profitable market variety on account of its good shipping and keeping qualities. To properly ripen should remain on the trees until leaves begin to fall, then gather carefully and allow to ripen in a cool dark cellar, or other place of even temperature. Tree a most vigorous grower, an early bearer, one of the most resistant to blight, very prolific, and widely planted throughout the country. The tree is so hardy and free from insect pests as to give it greater value than most other varieties. The fruit is of high color and great beauty and sells more readily than fruits of better quality. Oct. to Nov.

Wilder. One of the very earliest pears, attractively colored and of excellent quality; this new variety always finds a sale in market and is largely grown by commercial orchardists. Of medium to large size, irregular, bell-shaped, but with smooth surface; pale yellow with shadings of russet-red. The tree bears good crops early and annually. Early August.

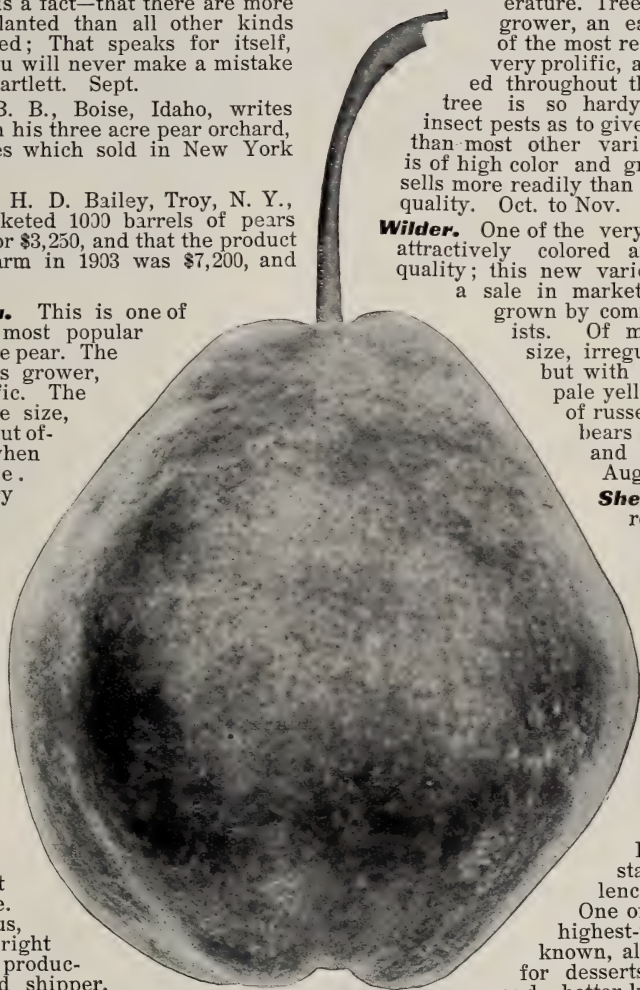

Sheldon. A large, round, russet and red pear of very fine quality, melting, rich and delicious. Tree vigorous, erect and handsome, bears well and should be more largely planted. Oct.

Seckel. A beautiful and delicious little Pear that is the standard of excellence in its class.

One of the richest and highest-flavored Pears known, always in demand for desserts and luncheons and better known than any Pear of its class. The tree makes a somewhat slow but stout and erect growth. Sept. and Oct.

Flemish Beauty. This fine old Pear is still one of the hardiest and most generally successful over a wide range of country, producing good crops annually of large, handsome fruit that is exceptionally good in quality. Considered one of the hardiest and best for the northwest in which location it bears great crops of perfect fruit. Sept. and Oct.

Vermont Beauty. This is one of the newer varieties, but one which should not be overlooked when picking out the different kinds you want to set. The tree originated in Northern Vermont and is very hardy and thrifty. The fruit is a little above medium

KIEFFER

Maloney Bros. & Wells Co.

DANVILLE N. Y.

size and very good. It has a bright yellow skin covered with crimson. One of the handsomest Pears on the market. The flesh is very white, rich, juicy and melting. The Vermont Beauty is of the finest quality. October and November.

Worden-Seckel. This beautiful and delicious pear attracted wide attention when introduced recently. In quality it is rated very high. In size it is much larger than Seckel. It is shaped like Bartlett but is not as large. A tree of this beautiful pear is an object of beauty on the home ground when laden with beautiful specimens. Oct.

Garber—One of the Japan Hybrids; larger than Kieffer; hardy, productive, early bearer; excellent for canning. September and October.

Clapp's Favorite. This is without doubt the most productive Pear on the market. A superb large, long yellow Pear, richly flushed, with russet-red next the sun. The flesh is fine grained, juicy, melting and buttery. A cross between Bartlett and Flemish Beauty; earlier than Bartlett and resembling Flemish Beauty in growth. It is as hardy as the Flemish Beauty; a fine grower and extremely productive. Our trees of this variety are exceptionally fine, for they were grown on our new farm, situated at an elevation of 1500 feet, which insures you of receiving hardy, healthy and vigorous trees, from which you are bound to get the best possible results. Early Aug.

Howell—Large, yellow, with red cheek; early bearer, and productive. September and October.

DANSVILLE'S PIONEER WHOLESALE NURSERIES

YORK STATE PRUNE

Plums

Price of all Varieties of Plum Trees

(Except Where Otherwise Noted)

				Each	Ten	Hundred
Largest size	2 year	6 to 7 feet	XXX	.20	\$1.85	\$17.60
Medium size	2 year	5 to 6 feet	XX	.18	1.50	12.00
Smaller size	2 year	4 to 5 feet	X	.12	1.00	8.50

Our Plums are all budded on whole roots of Imported French Myrobalan Stock.

The plum has not been planted as extensively as it deserves, and the lack of planting has doubtless been partly due to difficulty in marketing; but with the demand for good fruit in our eastern markets almost unlimited, and the establishment of canneries in most important fruit sections, it is again being planted in large quantities, as it is known that a little care and attention at the proper time will insure a profitable crop.

When making selection of varieties, do not overlook the Japanese sorts. These may be new to you, but they are valuable. Mr. Luther Burbank of California is to be credited with the introduction of the greater portion of Japanese varieties. Among the good ones that he recommends strongly are Burbank and Abundance, and any orchard is incomplete without these two varieties.

Soil. The best soil for Plums is a loose, deep, gravelly loam, with an open sub-soil, such as is suited for potatoes, although any soil may be used, provided it is well drained. For planting distance, see page 2.

Maloney Prune first came to our attention while growing in the garden of a good old Canadian living about one square from Mr. W. J. Maloney. Our friend invited us on the 15th day of November to see this tree as it then appeared. Imagine our surprise to observe a tree loaded with Prunes at that time of year, with fruit not only perfect but decidedly luscious. They had been using from the tree in a small way since the latter part of September. We kept a watchful eye on it the succeeding year and found exactly the same conditions. We were then convinced of its value, for it has the quality of a Fellemburg, the size of a York State Prune, and surpassing both for its long season extending from September 15th until freezing weather. Size large, color dark blue; flesh yellow and delicious; freestone; heavy annual bearer. It certainly is a marvel—just what the orchard man has been looking for.

Waltham, Mass., Nov. 14, 1912.

MALONEY BROS. & WELLS CO.,

Gentlemen: Never, since I bought my first nursery stock over forty years ago, have I been so well treated as by you, nor have I seen better trees or better root systems than yours. Out of all the trees that I bought for myself and neighbors last spring, only three failed to grow, in spite of the drought that we had for a whole month after planting. I shall try and duplicate my orders in the early spring.

Sincerely yours,

JAMES WORCESTER.

European Plums

York State Prune. One of the largest, best in quality and most productive of all prunes; large size, color dark blue, covered with purple black, delicious; originated in Dansville, N. Y.; a vigorous grower and hardy. Is being planted extensively and is considered the best for commercial purposes. Last of August.

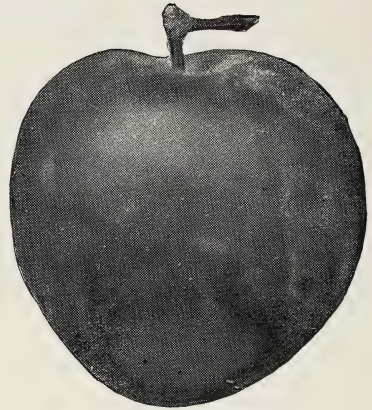

German Prune. Medium; oval; purple or blue; juicy, rich, fine. Tree vigorous and very productive. One of the best. September. Sells for higher prices in market on account of high quality. A leading favorite. There is no easily grown fruit that gives greater or more certain profit than the German Prune. Early Sept.

Hungarian Prune (Pond's Seedling). Very large dark red, juicy and very sweet. Its large size, bright color, productiveness and shipping qualities render it a profitable variety for home or distant markets. September.

Felleberg Prune. A fine prune, oval; purple; flesh juicy and delicious; parts from the stone; fine for drying; tree very productive. Early Sept.

Thanksgiving Prune. Very productive, good quality and long keeper. It will keep for weeks and months after picking like an apple. It is extremely hardy, as a matter of fact, will succeed in any state east of the Rockies; absolutely proof against severe winters. Mr. Maloney especially recommends this variety to you. Oct.

Imperial Gage. Rather large; oval; greenish; flesh juicy, rich and delicious, parts from the stone. Tree a vigorous grower; very productive and one of the best of plums. Middle of August.

REINE CLAUDE

Reine Claude (Bavay's Green Gage)—Roundish, oval, greenish, marked with red in the sun; a great favorite. September.

Pond's Seedling. A magnificent English plum; form of Yellow Egg; light red changing to violet; flesh rather coarse. Tree a vigorous grower and most abundant bearer. Sept.

Roosevelt. This variety was first offered under the above name as a premium by a publication at Rochester, N. Y., who claimed they had been watching this plum for the past few years and were surprised at the results obtained in that section. Roosevelt is very productive, fruit large, color purple, good quality, and unexcelled for eating and canning purposes. The tree is a hardy, vigorous, upright grower, and is one of the most remarkable plums yet introduced. It has been thoroughly tested by prominent orchardists. Oct.

Monarch. Tree an abundant bearer. Fruit large, dark purplish blue with dense foliage. Oct.

Diamond. A large magnificent plum, color a dark purple, with a beautiful bloom. Tree hardy and productive. Sept.

Coe's Golden Drop. Very large, light yellow often dotted with red in the sun; an excellent late sort. Last of Sept.

2 Yr. 6 to 7 Ft. 2 Yr. 5 to 6 Ft.
Hardy Upland Grown Plums

Our 29th Year

At Growing and Delivering Trees Direct from the Nursery to the Planter.

DANVILLE'S PIONEER WHOLESALE NURSERIES

Green Gage. Flesh pale green, melting, juicy, exceedingly sweet and rich and unequaled. Aug. 15th.

Bradshaw. A very large and fine early plum, dark violet red, juicy and good. Very productive; valuable for market. The tree is very hardy and vigorous. As regards productiveness it is unequaled by any plum we have ever fruited. To produce the finest fruit, heavy thinning should be practiced. The quality is excellent, and is destined to become one of the most popular of all plums for canning, while its attractive color, good quality and shipping properties will cause it to be sought for as a market variety. Middle of August.

Gueli. This is one of the newer varieties originating in New York state. Season of ripening rather late. The color is a dark purple. The flesh is firm, sub-acid and agreeable. Size large. It would be difficult to select a larger or more attractive plum for the garden or orchard than this. Sept.

Shipper's Pride. Large, nearly round; dark purple; quite juicy, sweet; splendid shipper and marketer; moderate grower; productive. Originated in northwestern New York. September.

Niagara. Red, large size, making an attractive appearance in market, and possesses good shipping qualities. It bears enormous crops of fruit. Tree is an upright grower, vigorous and healthy. Middle of August.

Tatge. Evidently a seedling of the Lombard. Is larger, more nearly round, darker color and finer quality than that well known variety. Claimed to be the hardiest, most productive and longest-lived plum known. Sept.

Lombard. Has always been a great favorite with plum growers. The tree adapts itself to all localities and it is very productive and extremely hardy. In our experience it outyields all other varieties. The fruit usually hangs so thick that we are compelled to thin out one-half. The more you thin it, the larger, brighter and better the remaining fruit will be. It is a handsome reddish plum, the flesh yellow, juicy and pleasant. It is an excellent variety and can be relied on for a crop when other varieties fail. Aug.

Moore's Arctic. Valuable for its productiveness and extreme hardiness. Fruit grown in clusters. Color dark blue or nearly black when fully ripe. Dr. Hoskins says this is the hardiest plum he has tested. Sept.

Shropshire Damson. One of the favorite Damsons. Fruit oval; tree a good grower and enormously productive; fruit of medium size produced in thick clusters or groups, dark purple color, esteemed for preserving. October.

Grand Duke. One of the best late plums for market, as large as Bradshaw, of same color, entirely free from rot. Last of September.

General Hand. A very large plum, roundish; color, deep yellow; flesh juicy. Sept.

Japan Plums

Burbank is decidedly the best of Japan varieties unsurpassed for beauty and productiveness, as well as a very hardy tree with foliage so perfect as to contribute in an essential degree to its health. One of the grand points about the Burbank is that it succeeds over a wide range of our country, and will stand the most severe winters. Fruit large, oval, with a reddish purple skin; flesh yellow, juicy and good. A good one. Aug.

Wickson. This largest of the Japan Plums is superb in every way. The color is bright cherry-red, covered with a light bloom; the pit is small for so large a fruit, the flesh is thick, sweet, tender and rather dry, indicating good keeping and shipping qualities. The fruit sells almost on sight. September.

Red June. The great early market Plum. Medium to large; deep vermilion-red, with beautiful bloom; very showy; flesh light lemon-yellow, firm, slightly sub-acid, delightful. It is the best in quality of any of the early Japanese plums, free from rot. Ripens in early August.

Abundance. One of the best Japan Plums. The tree a rapid grower, healthy, comes into bearing remarkably young and yields abundantly.

Fruit of medium size, large, when thinned; amber, with markings of red; juicy, sweet, of good quality when well ripened. May be picked when it begins to color; will keep a long time. August.

Satsuma (Blood). A delicious Plum for canning, already famous for that purpose, and a grand market sort; in season after the European Plums and the main crop of peaches are gone. Very large, nearly round, with deep red skin and flesh; firm, of good flavor; will keep from one to three weeks after picking. Yields well. Aug.

Climax. Tree extremely vigorous, upright, with strong branches and very large leaves. Productive as Burbank, about as large and usually two or three weeks earlier. July.

Meriden, Conn., Nov. 2, 1912

MALONEY BROS. & WELLS Co.,

Gentlemen: The plum and apple trees arrived in fine shape. They are certainly good trees and well worth the money. Thanks for prompt attention.

Yours sincerely,

George O. Knipfer

Quinces

Price of all Varieties of Quince Trees.

			Each	Ten	Hundred
Largest size	4 to 5 feet	XXX	.18	\$1.75	\$15.00
Medium size	3 to 4 feet	XX	.12	1.15	10.00

The Quince Crop is usually reliable and not often destroyed by capricious weather variations. The trees grow well in any good soil, but prefer a deep, moist loam. They are easy to prune and spray, and need but little attention. In almost all local markets they find a ready sale, as we have no finer fruit for preserves, jellies and canning. The fruit is quite fragrant.

Orange. The best of the older varieties, still more extensively cultivated than any other. Every one is acquainted with the Orange quince, a good old variety that never disappoints the planter; good for home use and for market. Its large golden yellow fruit of fine quality is to be seen in more or less quantities in nearly every garden or orchard every season, as it rarely fails to produce a crop. Ripens in Oct.

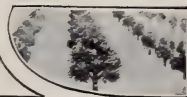

Rea's Mammoth. This seedling of the Orange quince has all the good qualities of that variety; its fair, handsome fruit is fully a third larger. Oct.

Meech's Prolific. Fruit is large, orange yellow, of great beauty and delightful fragrance. Tree a vigorous grower and immensely productive. Ripens between the Orange and Champion. Last of Oct.

Champion. A large, late-ripening sort, that produces good and constant crops. One of the best for sections not subject to early frosts. Last of Oct.

DANSVILLE'S PIONEER WHOLESALE NURSERIES

Letters of Appreciation

Owego, N. Y., Apr. 23, 1912.
Maloney Bros. & Wells Co.
Gentlemen:—In a long life I have had trees and shrubs from most of the nurseries of the country, but never have I had any as nicely packed and fresh and as fine trees as those from you that arrived yesterday. You have an annual customer here as long as we both live.
Yours truly, C. M. LAMONTE.

Mooresburg, Pa., Apr. 16, 1912.
Maloney Bros. & Wells Co.
Gentlemen:—I beg to inform you that the trees received from you are the best I have seen shipped to this district this season. Some of the trees were for several of my neighbors and they were surprised to receive such trees at that price.
Yours very truly, W. H. DAVIS.

Cambridge, Ohio, Apr. 4, 1912.
Maloney Bros. & Wells Co.
Gentlemen:—The fruit trees ordered from you last Fall were received in first class condition and stood the winter all right, and are looking fine this spring after one of the hardest winters on record, the mercury going as low as thirty-two degrees below zero.
Respectfully, J. H. RICHARD.

Buffalo, N. Y., Nov. 4, 1912.
Maloney Bros. & Wells Co.
Gentlemen:—The trees which I bought of you for delivery at Attica, N. Y., arrived on the 19th of Oct. and are all set out. I desire to say that they are the nicest lot of trees I ever saw, and were shipped in fine shape.
Yours truly, LAFAY C. WILKIE.

Fricke, La., Apr. 22, 1912.
Maloney Bros. & Wells Co.
Dear Sirs:—Am pleased to inform you that the trees arrived in good shape. Allow me to compliment you for the way in which they were packed.
Yours very truly, A. FRICKE.

Pavia, Pa., March 12, 1912.
Maloney Bros. & Wells Co.
Gentlemen:—The trees I received this year were fine. They all grew and only cost half as much as agents were selling for through our neighborhood.
Yours truly, JOHN ICKES.

Lockport, N. Y., Apr. 10, 1912.
Maloney Bros. & Wells Co.
Gentlemen:—The box of trees shipped me from your place just received. I have inspected same and find them O. K. I will state that I am very much pleased with the stock you sent, and am sure my future orders will go to M. B. & W. Co.
Very truly yours, JOS. H. WILSON.

Andover, Mass., July 30, 1912.
Maloney Bros. & Wells Co.
Gentlemen:—The trees, etc., ordered of you in the spring were better than I expected and every one, no exception, is alive and is doing fine, and I assure you of my order for more next spring.
Very truly yours, W. A. LARKIN.

Brantford, Ont., Can., Apr. 29, 1912.
Maloney Bros. & Wells Co.
Gentlemen:—The nursery stock I ordered from you arrived in good condition. I can safely recommend your firm for good stock, promptness and a square deal.
Yours truly, F. H. BROWNE.

Spring Valley, N. Y., May 8, 1912.
Maloney Bros. & Wells Co.
Gentlemen:—The trees, shrubs, etc., that you sent me were received in fine order, promptly planted, and are doing nicely. I consider your trees No. 1. stock, straight and healthy, with a splendid growth of roots and I consider that you have given my order close attention.
Thanking you and commending your business-like method, I beg to remain,
Yours truly, W. PARKER SMITH.

Russian Apricots

Beautiful and delicious fruit. In quality and appearance is between plum and peach, combining qualities of both. Ripening early, together with its delightful flavor makes it one of the most valuable fruits. Tree hardy as the peach. Requires about the same cultivation as the peach or plum. It ships well and commands a good price in any market. For drying and canning, it has no superior. The Russian varieties are quite distinct from the other European sorts; much hardier, earlier bearers and productive.

Alexander. Very hardy and immense bearer; fruit large; yellow, flecked with red; very beautiful, sweet and delicious. July.

Alexis. Very hardy and abundant bearer; yellow with red cheek; large to very large; slightly acid, rich and luscious. July.

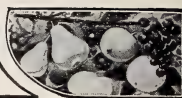

Gibb. Tree hardy; grows symmetrical; productive. Fruit medium; yellowish, sub-acid, juicy and rich. The best early variety, ripening soon after strawberries. Last of June.

J. L. Budd. Tree a strong grower and profuse bearer. Fruit large, white with red cheek, sweet, juicy with a sweet kernel, as fine flavored as an almond. The best late variety. August.

Moorpark. One of the largest. Orange with red cheek; firm, juicy, with a rich flavor; very productive. August.

Bargains in Fruit Trees

Smaller Size

Some buyers of trees have an idea that nothing but the largest size trees are fit to plant, that all other sizes are poor trees. This is a mistake, as some of the best orchards are grown from the smaller size trees. Our four to five foot trees are not third class, but first class of their size, and while we do not recommend the small planter, or one who plants but a few trees, to select these for his planting, we do recommend the medium and small trees to the orchardist. We have an especially nice lot of peaches, apples, pears, cherries and plums at special prices.

2 YR. APPLE Bargain Size

Black Raspberries

Kansas Black. This variety is a strong, vigorous grower, standing extremes of drought and cold, and bearing immense crops. Early. Berries size of Gregg, of better color; jet black and almost free from bloom; firm, of best quality, presents a handsome appearance, and brings highest price in market. The average yield of an acre of Kansas in dried raspberries is 500 pounds. The average price, year by year, is twenty cents per pound.

Price, 40 cents per 10, \$1.50 per 100, \$10.00 per 1000.

Gregg Black. Of good size; fine quality very productive and hardy. It takes the same position among black caps as Cuthbert among the red sorts. No one can afford to be without it. The standard black cap by which others are judged.

Price, 40 cents per 10, \$1.50 per 100, \$10.00 per 1000.

Conrath, Early Black. In Conrath we have united vigor, hardiness, large size and productiveness; qualities that will give it a foremost rank.

Price, 40 cents per 10, \$1.50 per 100, \$10.00 per 1000.

Cumberland New Black. This new berry is a very valuable acquisition. With its greatly superior size it combines the equally valuable characteristics of great firmness, splendid quality and wonderful productiveness. Fruit very large, firm. Mid-season.

Price, 40 cents per 10, \$1.50 per 100, \$10.00 per 1000.

Plum Farmer Black. This very large and productive black raspberry has been thoroughly tested in western New York where it is a great favorite for market or home use. It is covered with a grayish bloom, like the bloom on a grape, which makes it very attractive in appearance. It ripens very early and quickly. The fruit is enormously large.

Price, 40 cents per 10, \$1.50 per 100, \$10.00 per 1000.

Diamond Black (New). A valuable variety, hardy, productive, firm, of fine quality, jet black, and one of the best market sorts.

Price, 40 cents per 10, \$1.50 per 100, \$12.00 per 1000.

Purple and Yellow Raspberries

Columbian Purple. A strong grower, unexcelled for productiveness and desirable for canning. Fruit very large, purplish color, rather soft; rich, sprightly flavor.

Price, 50 cents per 10, \$1.75 per 100, \$12.00 per 1000.

Shaffer's Colossal Purple. An immense raspberry, both in cane and fruit. Berries are very large and of a purplish color.

Price, 50 cents per 10, \$1.75 per 100, \$12.00 per 1000.

Golden Queen, Yellow. Very large, hardy, vigorous, and productive. No gardens should be without it.

Price, 50 cents per 10, \$1.75 per 100, \$12.00 per 1000.

Red Raspberries

Cuthbert. This is a valuable variety well tested throughout the country. It has given good results both for home use and market. Cuthbert is a good vigorous grower and possesses vitality necessary for a popular variety. It yields bountifully of large and beautiful bright red berries, which are easily picked and always command good prices. No fruit grower can afford to omit planting Cuthbert, and surely no person who has a garden should attempt to get along without red raspberries.

Price, 35 cents per 10, \$1.25 per 100, \$9.00 per 1000.

Loudon. Very hardy, yields 200 bushels per acre, bears best on strong clayey loam, but succeeds well on sand.

Price, 50 cents per 10, \$1.50 per 100, \$12.00 per 1000.

Blackberries

Price of all Varieties

35c per 10,

\$1.75 per 100,

\$15.00 per 1000

Eldorado. The vines are very hardy and vigorous, and their yield is enormous. The berries are large, jet black, borne in large clusters and ripen well together; they are very sweet, melting, have no hard core and

keep for eight or ten days after picking with quality unimpaired.

Mersereau. Remarkably strong grower, upright, producing stout, stocky canes. An enormous producer of extra-size berries, which are brilliant black and retain color; extra quality; sweet, rich and melting, without core. Ripens very early.

Minniewaska. This wonderful, hardy, productive, good blackberry has not been forgotten by us, or our old patrons. Its principal points are hardiness, excellent quality, earliness, and continued bearing and productive-ness.

Snyder. Extremely hardy, enormously productive; medium size, no hard, sour core; sweet and juicy. Ripens early.

Erie. Fruit very large, a strong grower and great bearer.

Blower's. Claimed to be the hardest, most productive, of finest quality and to bring the highest market price.

Lawton. The oldest blackberry under cultivation, too well known to need a description.

Strawberries

Price of all Varieties

Express:
Mail:

60 cents per 100,
20 cents per 10,

\$5.00 per 1000
.85 per 100

Strawberries will be shipped separate from other orders, and not before May 1st.

Corsican. A great strawberry for many reasons. First, it is the biggest berry; second, it is the brightest and best in color; third, it is a great yielder and producer; fourth, and the most important of all, the foliage is exceedingly vigorous and leathery, resisting fungus, drought, weeds, and even neglect of cultivation. Plantations of Corsican continue in bearing longer than any other variety we have.

Brandywine. (Per.) Late. The strong, upright growing plants, produce an abundance of very large berries on erect fruit stems. They are of good color and shape and possess a very fine peculiar flavor. Begins to ripen in midseason, and continues until blossoms are killed by the frost.

William Belt (Per.) A handsome variety that is giving remarkable satisfaction as a large productive berry for market or home use. Ripens all over without green tips; good quality; carries well to market and brings highest price.

Senator Dunlap. (Per.) Season early to medium; popular market sort. It withstands all conditions of weather beyond the average. Very productive; dark red all through.

Wilson. The best berry for canning. This is an old well thought of variety that has always given satisfaction. One of the very best berries for flavor and quality. We recommend this variety to you.

Marshall. An exceedingly handsome, high colored, very large berry of extra fine quality; ripening early. Plant very strong, with high culture produces heavy crops. The best early large variety.

CORSICAN

Gooseberries

Plant in good rich soil and give a liberal dressing of manure every season. Regular pruning every year is essential for the production of fine fruit.

Downing. Largest and best of all native American varieties. This valuable variety originated with Charles Downing, greatest of all pomologists. The value of Downing lies in its large size, fine quality, beautiful appearance, vigorous growth, and freedom from mildew. Downing is free from spines, of a transparent color, tending to yellow; bush upright, keeping the fruit from the sand. Enormously productive.

Price, 2 year bushes, 12 cents each, \$1.00 per 10, \$8.00 Per 100.

Red Jacket. An American seedling of large size, smooth, prolific and hardy, of best quality. Has been well tested over a wide extent of territory by the side of all the leading varieties, and so far the most free from mildew, both in leaf and fruit, of them all. A wonderful cropper.

Price, 2 year bushes, 12 cents each, \$1.00 per 10, \$8.00 per 100.

Chautauqua. Bush very vigorous, stout, upright; foliage large, glossy, dark green. Fruit large, smooth, veined, translucent; skin thick; quality very sweet and high-flavored.

Price, 2 year bushes, 20 cents each, \$1.75 per 10, \$15.00 per 100.

Industry. Marvelously productive and bears second, if not the first year planted. The fruit is of large size, color dark red. When making out your order, do not fail to include some of this variety, as it has been thoroughly tested in nearly every state in the country, and is extremely popular everywhere.

Price, 2 year bushes, 20 cents each, \$1.75 per 10, \$15.00 per 100.

DOWNING

Grapes

Price of all Varieties of Grape Vines

	EACH	TEN	HUNDRED	THOUSAND
2 year	.10	.90	\$5.00	\$40.00
1 year	.08	.75	4.00	35.00

Every city and country garden should have a dozen or more grape vines. They do admirably trained up to the side of any building, or along the garden fences, occupying but little room and furnishing an abundance of the healthiest fruit. Plant about 8 feet apart, by the fence or building. For vineyards, make rows 8 feet apart, 6 to 10 feet in rows.

Concord. Black. Early. Decidedly the most popular Grape in America and deservedly so. Bunch large, shouldered, compact; berries large, covered with a rich bloom, skin tender, but sufficiently firm to carry well to distant markets; flesh juicy, sweet, pulpy, tender; vine a strong grower, very hardy, healthy and productive. For general

cultivation the most reliable and profitable variety.

Delaware. Red. Bunches small compact, shouldered; berries rather small, round, skin thin, light red; flesh very juicy, sweet spicy, and delicious.

Brighton. Red. Bunch large, well formed; berries above medium to large, round; excellent flavor and quality; one of the earliest in ripening.

Diamond White. The leading early white grape, ripening before Moore's Early. White, with rich yellow tinge; juicy, few seeds, almost free from pulp, excellent quality; above medium size, adheres firmly to stem. Vine like Concord in growth, hardiness and foliage.

CONCORD

DANSVILLE'S PIONEER WHOLESALE NURSERIES

Grapes (Continued)

Worden. Black. Bunch large, sometimes shouldered, compact; berries very large, skin thin. Superior to the Concord in the following points: it is better in quality, has a larger berry, a more compact and handsome cluster and ripens five to ten days earlier.

Moore's Early Black. Bunch large, berry large round with heavy bloom, vine exceedingly hardy. Its earliness makes it desirable for an early market. Its hardiness particularly adapts it to Canada and northern portions of the United States; succeeds admirably in the south.

Campbell's Early Black. Strong grower, with large, healthy foliage, productive; its keeping and shipping qualities are equalled by no other early grape. Ripens with Moore's Early. Bunch and berry large, glossy black with blue bloom, sweet and juicy, seeds few and small, part readily from the pulp. Stands at the head of early black grapes for quality.

Niagara White. Occupies the same position among the white varieties as Concord among the black; the leading profitable market sort. Bunch and berries large, greenish white changing to pale yellow when fully ripe. Skin thin but tough; quality much like Concord.

Grape Vines at a Bargain

12 Strong 2-Year Vines for 75c.

We offer 3 Worden, black: 3 Concord, black: 1 Campbell's Early, black; 2 Brighton Red; 3 Niagara, white. All 2-year old, first Class Grape Vines for 75 cents, regular price being \$1.10.

Catawba. Dark red when fully ripe. Bunch large, berries medium to large, skin thick, tough; flesh somewhat pulpy, with rich vinous flavor, of best quality for both table and wine.

McKinley Early (New White). Strong grower; bunches large, compact and handsome; berries large and oval like Malaga Grapes; green at first, turning to yellow when fully ripe; very sweet. Extra quality; a good shipper; remarkable keeper; will hang on vines sound and perfect for weeks after ripe. Ten days earlier than Niagara with the richest flavor of any Grape on the market.

Garden Roots

Rhubarb or Pie Plant

This affords the earliest material for pies and tarts; continues long in use and is valuable for canning. Make the border very rich and deep; needs high culture.

Linnaeus—Large, early, tender and fine. The very best of all.

10 cents each, 50 cents per 10, \$4.00 per 100.

Asparagus

To plant, see that the ground is well drained. Work it up fine and deep, make it very rich with well-rotted manure. Locate the plants eight inches apart in rows three feet apart, spread out the roots in a trench made deep enough to permit the crowns to be covered with three or four inches of mellow earth. Give the bed a dressing of manure and except near the seashore three pounds of salt early every spring. Do not cut for use until the plants have grown two seasons.

Palmetto. A very early variety even, regular size and of excellent quality. It has been tested both north and south and has proven entirely satisfactory.

15 cents per 10, \$1.00 per 100, \$5.50 per 1,000.

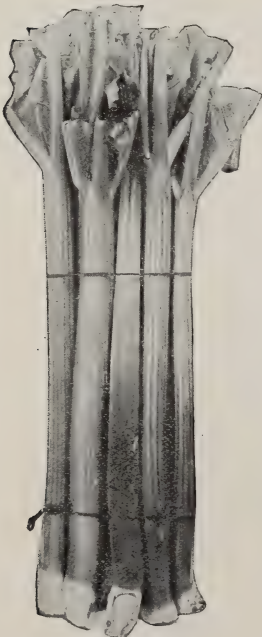

Conover's Colossal. Very large, makes rapid growth; planted mostly by market-gardeners; very productive.

20 cents per 10, \$1.00 per 100, \$5.50 per 1,000.

HOLT'S MAMMOTH SAGE. Plants of strong growth. Leaves large, borne well above the ground. Of strong flavor and superior quality. Price of strong 2 year roots, 10 cents each, 10 for 75 cents.

HORSE RADISH. Will stand a great deal of hardship and exist in soil year after year. Plant in deep, rich, cool soil. The yield will vary according to the soil and treatment. As high as ten tons have been secured from an acre.

Price: Strong Sets, 25 cents per 10, 75 cents per 100, \$6.00 per 1,000.

PIE PLANT

ASPARAGUS

Currants

Price of all Varieties of Currant Bushes

(except where otherwise noted)

	EACH	TEN	HUNDRED	THOUSAND
2 year	.10	.60	\$4.50	\$40.00

Plant in rows 6 feet apart and 4 feet apart in the rows, or if to be cultivated both ways, 5 feet apart each way. Before planting, the roots should be shortened to 10 or 12 inches, and in planting care should be taken to firm the earth about the roots. After planting, cut back the tops about one-half the previous year's growth. No plant will better repay generous treatment and high cultivation than the currant. Two or three forkfuls of good stable manure around each bush every fall is desirable.

Wilder (President Wilder). Bush upright, vigorous; clusters above medium length; berries large to very large, averaging large; bright red; excellent, with a mild sub-acid flavor. Ripens early and remains bright and firm until very late. Because of its exceedingly vigorous growth, great productiveness, high quality and remaining good so long after ripening, we recommend this as one of the best red currants, both for table and market.

PRESIDENT WILDER

Home Garden Collection of Currants

10 Bushes, 2 year old, for 60 cts.
3 Red Cross, 3 President Wilder
2 White Grape 2 Black Champion
10 Strong, 2 year Currant Bushes,
Special Bargain Price, 60 Cents.

Cherry. Bush vigorous, stocky and compact; cluster rather short, with short stems; fruit averages large; color fine, bright red; berry thin-skinned, juicy and fine-flavored. One of the most productive of the large Currants.

White Grape. Bush vigorous, somewhat spreading, productive; clusters long; berries large to very large, averaging large; of very attractive color, mild flavor and good quality. A good table variety.

Red Cross. A strong growing variety. Cluster long; berry medium to large, bright red; quality good to best. It is exceedingly productive, and the currants are of large size. Further than this, the fruit is far sweeter than ordinary currants.

Black Champion. Bush vigorous, and productive; fruit averages above medium; pulp nearly sweet, mild-flavored. A desirable variety for general culture.

Fay (Fay's Prolific). Bush vigorous but not quite so strong a grower as Cherry; cluster medium to long, with rather long stems; color darker; and berry averages large; juicy and less acid than Cherry. The high prices prevailing this year teach that the proper thing to do is to go right along growing fruit whether the price is high or low. It certainly does not pay to stop growing simply because prices for a year or two are low.

Red Dutch. An old, well-known sort, good quality berry, medium, long bunch. Very productive.

Victoria. Bright red, bunches extremely long; berries medium size, of excellent quality. Good erect grower, very productive. Ripens late, making it one of the most valuable sorts.

Perfection. In color it is a beautiful bright red, a size larger than the Fay; clusters average longer and the size of berries are maintained to the end of the bunch. It is one of the most productive Currants we have ever known; quality is superior to anything in the market, being of a rich, mild sub-acid flavor and having plenty of pulp with few seeds.

Price 2 yr., 15 cents each, \$1.25 per 10, \$8.00 per 100.

DANSVILLE'S PIONEER WHOLESALE NURSERIES

Our Exhibit of Fruit Trees at the State Horticultural Meeting at Harrisburg, Pa. 1911

Reading from right to left the parties in illustration are: Walter E. Seeley, Nescopeck, Pa., W. J. Lewis, Pittston, Pa., C. B. Care, Linglestown, Pa., and our Representative.

Nut Trees

American Sweet Chestnut is adapted to a great portion of this country. It is valuable as a nut producing tree, timber and ornamental purposes. As high as \$14.00 per bushel has been paid for American Sweet Chestnuts when first brought into New York market. \$6.00 to \$10.00 per bushel is the common price. A well grown American Chestnut that has passed the quarter-century mark is a gracious delight to the eye of the lover of trees, and there is a peaceful, dignified impressiveness about a grove of old chestnut trees that is good to experience.

Price, 4 to 5 feet, 35 cents each, 10 for \$3.00; 3 to 4 feet, 30 cents each, 10 for \$2.50.

English Walnut. A fine, lofty, growing tree, with handsome, spreading head; produces large crops of thin-shelled, delicious nuts which are always in demand at good prices. They are fairly hardy and are fruiting here in the Genesee Valley.

Price, 3 to 4 feet, 50 cents each, 10 for \$3.75.

Black Walnut. The common well-known Black-Walnut, the wood of which is most beautiful and valuable. It is very productive in nuts, which are much liked by many.

Price, 4 to 5 feet, 35 cents each, 10 for \$3.00; 3 to 4 feet, 30 cents each, 10 for \$2.50.

Chestnut, Spanish. A handsome round headed tree, producing abundantly, very large nuts that find a ready market at good prices.

Price of Spanish Chestnut trees, 4 to 5 feet, 50 cents each, 10 for \$3.00.

Butternut. A fine native tree producing a large longish nut, which is prized for its sweet, oily, nutritious kernel.

Price of Butternut trees, 4 to 5 feet, 35 cents each, 10 for \$3.00.

AMERICAN ELM, The Most Famous of all American Trees

Ornamental Trees

American Elm. The most admired of all American trees. A natural spreading and drooping tree of our own American meadows and forests, spoken of by many as the most beautiful of all American trees. It is very attractive in any suitable location, is entirely hardy and easily transplanted. There are more Elm trees planted along our streets and highways than any other one variety. This is on account of its dense green foliage, which spreads out from overhead, covering a suitable space of ground in proportion to the size of the tree, which makes it the finest shade tree in the world.

Price, 8 to 10 feet, 50 cents each, 10 for \$4.50, 6 to 8 feet, 40 cents each, 10 for \$3.50.

Maple, Ash-Leaved (Box Elder). A fine, rapid-growing variety, with handsome, light green foliage and spreading head; very hardy; desirable for street planting and succeeds in many sections where other varieties do not thrive.

Price, 8 to 10 feet, 35 cents each, 10 for \$3.00; 6 to 8 feet, 30 cents each, 10 for \$2.75.

Norway Maple. This is one of the hardiest ornamental shade trees, and one of the most beautiful. It makes more of a wide spreading tree than the sugar maple.

Price, 8 to 10 feet, 45 cents each, 10 for \$4.00; 6 to 8 feet, 35 cents each, 10 for \$3.00.

Sugar or Rock Maple. This native tree of ours is a universal favorite for street planting, and desirable everywhere. It is considered a slow grower, but is long-lived.

Price 8 to 10 feet, 45 cents each, 10 for \$4.00; 6 to 8 feet, 40 cents each, 10 for \$3.50.

Catalpa, Bungei. (Umbrella Catalpa.) Grafted on stems 6 to 8 feet high, it makes an umbrella-shaped top without pruning. Perfectly hardy, and flourishes in almost all soils and climates. Leaves, large, glossy, heart-shaped. A very desirable ornamental.

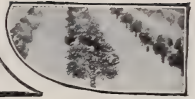

Price of Trees, 6 to 8 feet, 75 cents each, 10 for \$7.00.

CATALPA, BUNGEI

DANVILLE'S PIONEER WHOLESALE NURSERIES

CUT-LEAVED WEEPING BIRCH

Wier's Cut-Leaved Maple. One of the most remarkable and beautiful trees, with cut or dissected foliage. Its growth is rapid, shoots slender and drooping, as graceful as cut leaved birch.

Price, 8 to 10 feet, 60 cents each. 6 to 8 feet, 50 cents each, 10 for \$4.50.

New Large Leaved Carolina Poplar

This tree takes front rank among the best of poplars. It is one of the most rapid growers among shade trees, frequently growing eight feet during one season and thus making fine shade in two or three years. It is very desirable when planted at the roadside, in parks or along rivers and streams. It has an advantage over other shade trees because it will grow in any kind of soil.

Bargain Prices for Carolina Poplar trees :
10 to 12 feet high, 20 cents each, 10 for \$1.50, 100 for \$12.00.
8 to 10 feet high, 15 cents each, 10 for \$1.35, 100 for \$10.00.
6 to 8 feet high, 10 cents each, 10 for 80 cents, 100 for \$7.50.

Cut-Leaved Weeping Birch. This noble tree is not only the most popular of the weeping trees, but it is decidedly the best. Its tall, slender, yet vigorous growth, graceful branches, silvery white bark, and delicately cut foliage, present a combination of attractive characteristics rarely met with in a single tree.

Price of Cut-Leaved Weeping Birch, 5 to 6 feet trees, 40 cents each, 10 for \$3.00.

Teas' Weeping Mulberry. The most graceful and hardy weeping tree in existence. Forms a perfect shaped head, with long, slender, willowy branches, drooping to the ground.

Price, 4 to 5 feet, \$1.00 each.

Purple Leaf Beech. The blood-leaved tree possesses all the qualifications of an ordinary beech and, in addition has beautiful red leaves.

Price of Purple Beech trees, three feet high, 50 cents each, 10 for \$4.50.

American Linden or Basswood. A rapid growing, large-sized, beautiful native tree, with very large leaves and fragrant flowers.

Price, 6 to 8 feet, 50 cents each, 10 for \$4.50.

Horse Chestnut, White Flowering. The well-known European species; very handsome; has magnificent spikes of white flowers. As a lawn tree or for the street it has no superior.

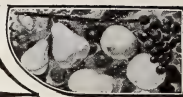

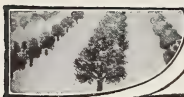

Price, 4 to 5 feet, 45 cents each, 10 for \$3.50.

Maple, Silver Leaved or Soft. Foliage bright green above and silvery underneath. An exceedingly rapid grower. Makes a large tree. A very satisfactory tree to plant in large quantities.

Price of Silver-Leaved Maple, 8 to 10 feet, 45 cents each, 10 for \$3.50, 6 to 8 feet, 35 cents each, 10 for \$3.00.

CAROLINA POPLAR

Ornamental Trees (Continued)

LARGE FLOWERING CATALPA SPECIOSA

Catalpa, Speciosa. One of the most rapid growers. Valuable for timber, fence posts, railroad ties, etc., possessing wonderful durability. Large, heart-shaped, downy leaves, and compound panicles of white flowers tinged with violet and dotted with purple and yellow. Very ornamental and useful.

Price for first class Trees 6 to 8 feet, 30 cents each, 10 for \$2.50.

Thorn, Double Pink. Double pink or rose flowers, with white tips.

Price for first class Trees 3 to 4 feet, 35 cents each 10 for \$3.25.

Thorn, Paul's Double Scarlet. Flowers deep crimson, with scarlet shade; very double.

Price of Trees 3 to 4 feet, 35 cents each, 10 for \$3.25.

Thorn, Double White. Small, double, daisy-like flowers in clusters.

Price for first class Trees, 3 to 4 feet, 35 cents each, 10 for \$3.25.

Russian Mulberry. Very hardy, vigorous grower, very productive, fruit black and of medium size.

Price, 6 to 8 feet, 50 cents each, 10 for \$4.50.

Mulberry, Downing. This tree is not alone valuable for the large refreshing berries it bears, but is very handsome as a lawn or street tree. This should be in every yard or garden.

Price, 4 to 5 feet, 50 cents each, \$4.50 per 10.

Kilmarnock Weeping Willow (Salix). It forms without any trimming, an exceedingly graceful tree with large, glossy foliage and perfect umbrella shaped head; unique in form.

Price, 75 cents each.

Hardy Climbing Vines

Ampelopsis Veitchi (Boston Ivy.) This is one of the finest climbers we have for covering walls, as it clings firmly to the smoothest surface, covering it closely with overlapping foliage, giving it the appearance of being shingled with green leaves.

Price of strong 2 year plants, 25 cents each, 5 for \$1.00.

Wisteria, Chinese Purple. A most beautiful climber of rapid growth and producing long pendulous clusters of pale blue flowers. **35 cents each, 10 for \$3.00.**

Dutchman's Pipe. Brownish flowers, resembling a miniature pipe; splendid for archways or verandas.

Price of strong 2 year plants, 50 cents each, 10 for \$4.50.

Halleana (Hall's Japan Honeysuckle). An almost evergreen honeysuckle of the greatest value, being hardy and of strong growth. The flowers are fragrant, of a pure white, changing to yellow.

Price of strong 2 year plants, 25 cents each, 10 for \$2.00.

Trumpet Vine. A robust, woody vine; twining tightly with numerous roots along its stems. Its orange scarlet, trumpet-shaped flowers cluster at the tip of the branches. Plant in a sunny spot in good garden soil, dug very deep, placing the crown of the roots three-fourths inch below the surface of the soil.

Price of strong, 2 year plants, 25 cents each, 10 for \$2.00.

American Ivy or Virginia Creeper (A. Quinquefolia). A native vine of rapid growth, with large, luxuriant foliage, which in autumn assumes the most gorgeous crimson and purple coloring.

20 cents each, 6 for \$1.00.

Henryii Clematis. A vigorous grower and a free bloomer, producing its large pure white flowers constantly during the summer and early autumn. The best large-flowered variety producing pure white flowers.

Price for strong 2 year plants, 35 cents each, 10 for \$3.00.

Jackmanni Clematis. The flowers are large, intense, rich, velvety violet-purple, and are produced in such masses as to form a cloud of bloom. This is the best known Clematis, and should have credit of the great popularity now attending this family of beautiful climbers. Though originated in 1862, since which time many new varieties have been raised and introduced, the Jackmanni has no superior and few equals.

Price for strong 2 year plants, 35 cents each, 10 for \$3.00.

Paniculata Clematis (Sweet-scented Japan Clematis). Of very rapid growth, quickly covering trellises and arbors with handsome, clean, glossy foliage. The flowers are of medium size, fragrant, pure white, borne in immense sheets in September, when very few other vines are in bloom.

Price of strong 2 year plants, 35 cents each, 10 for \$3.00.

Hardy Flowering Shrubs

Price of all Varieties of Shrubs

	Large size	2 year	EACH .16	TEN \$1.50	HUNDRED \$12.50
--	------------	--------	-------------	---------------	--------------------

A BUSH OF SPIREA VAN HOUTTEI IN FULL BLOOM

Althea. A large shrub, sometimes trimmed into tree form, that blooms freely in August or September, when almost every tree is out of bloom. Vigorous grower and succeeds everywhere. Also called Rose of Sharon. We can furnish double varieties in these colors: Althea Double Purple, Red, Pink and White.

Deutzia, Crenata, Double-Flowering. A hardy, vigorous shrub that does not suffer from insects or diseases and early in the season is fairly covered with very showy double white flowers that on the edge are slightly tinged with rose. Handsome, desirable shrub.

Deutzia, Gracilis. Pure white flowers in June. Two feet high when fully grown.

Deutzia, Lemoinei. Dwarf, the flowers are large, pure white and produced freely.

Deutzia, Pride of Rochester. Blooms in May. Double, white, tinted with rose on the edge.

Golden-Leaved Elder. The best of all the colored shrubs. A plant of this bush in a bed, or a border, or on the lawn, is a conspicuous feature, the foliage being as yellow as gold.

Weigela, Candida. The flowers are of the purest white, blooming in June, and all summer. Hardy.

Weigela, Eva Rathke. With showy, bright red flowers borne freely during the summer.

Weigela, Floribunda. The flowers are dark crimson, with white stamens somewhat like Fuchsia flowers. It blooms in the spring and in the fall.

Weigela Rosea. This is one of the most charming shrubs in cultivation; it cannot be too highly recommended; the flowers are large and of deep rosy color, and are borne in great profusion.

Lilac, Purple. An old favorite; purple flowers.

Calycanthus (Sweet-scented shrub). The wood is fragrant; foliage rich; flowers are of chocolate color, having a peculiarly agreeable odor.

Spiraea, Billardi. A hardy, free growing shrub. During July every branch and twig is tipped with a spike of beautiful blood-red flowers 4 to 6 inches in length. A distinctive and beautiful flower and shrub.

Spiraea Callosa Alba. A white flowering variety, of dwarf habit; very fine.

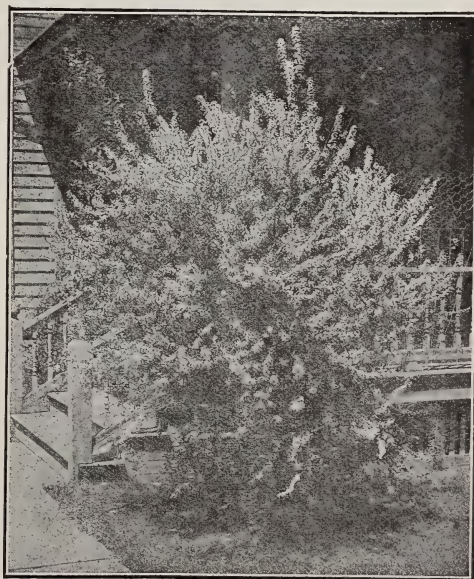

Spiraea Douglasi. Has spikes of beautiful, deep rose-colored flowers in July and Aug.

Spiraea Callosa Rosea. Has large panicles of deep rosy blossoms: grows freely and blooms nearly all summer; fine.

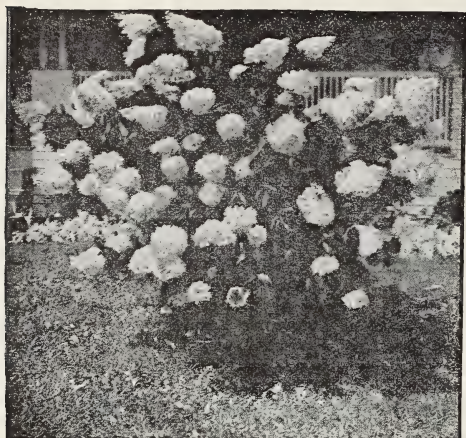

Spiraea Van Houttei. This is undoubtedly the best of the spiraeas. The cut shown is a fair one and shows it in full blossom. The blossoms are white. Do not pass it by.

Fringe Purple or Smoke Tree. A very elegant and ornamental large shrub, with curious, hair-like flowers of a pinkish brown color which sometimes literally cover the tree and remain all summer.

Lilac, White. A well known favorite.

DEUTZIA, PRIDE OF ROCHESTER

THE BUSH HYDRANGEA (*Paniculata Grandiflora*)

White Fringe. A popular and much admired shrub of moderate growth, and rounded form, with large, dark green, glossy leaves, and long drooping panicles of beautiful white fringe-like flowers.

Forsythia Fortunei (Golden Bells). Deep yellow flowers in great profusion in April.

Hydrangea, Paniculata Grandiflora. Absolutely hardy; thrives in all soils; grows rapidly and blossoms profusely. The flowers are pure white, afterward changing to pink, and are borne in large pyramidal trusses often more than a foot long and six to eight inches in diameter. Begins to bloom early in August, and continues to bloom for several weeks. Wherever known it is considered to be one of the finest flowering shrubs.

Upright Honey Suckle (white.) Pure white flowers followed by deep red berries that fill the bush till autumn; very attractive.

Upright Honey Suckle (pink). Pink flowers which contrast beautifully with the foliage.

Mock Orange. Flowers white, deliciously perfumed. Derives its name owing to flowers resembling orange blossoms; a delightful substitute for that noble flower.

Japan Barberry Thumbergii. One of the most hardy and valuable species; foliage tinted in autumn.

Common Barberry. Clusters of red berries.

Purple Barberry. Similar to Common Barberry only that the foliage is purple.

Snowball, Common. A popular shrub. Makes a large bush. Bears balls of pure white flowers in June.

Hedge Plants

California Privet. A vigorous-growing variety, of fine habit, thick, glossy, nearly evergreen leaves. Of all ornamental hedge-plants this is the most highly prized. If cut to the ground one or two years after planting, it makes a very thick hedge right from the bottom, sending up many strong shoots. The leaves are a rich green, and will remain on the plants up to Christmas, and if they are a little sheltered they will keep green almost all winter. This is especially the case if the hedge has attained some age and has frequently been trimmed. Though it is a very strong grower, it can be kept to a low size by frequent trimming. Where a close, compact hedge is desired we recommend California Privet. Should be planted about eight to ten inches apart to give best results.

Strong plants, well branched, 18 to 24 inches
Strong plants, well branched, 24 to 30 inches

EACH	TEN	HUNDRED	THOUSAND
.05	.45	\$3.00	\$25.00
.08	.65	4.00	35.00

Barberry Thumbergii. A pretty plant of dwarf habit from Japan. Very graceful and its foliage turns to a beautiful red in the fall. All Barberries make very fine hedges.

Strong plants, 18 to 24 inches, well branched, 16 cents each; \$1.50 per 10; \$14.00 per 100.

Norway Spruce. There is no evergreen so largely planted as the Norway Spruce. It is indeed a tree possessed with great beauty at all seasons of the year, but particularly in winter when its branches are weighed down with newly fallen snow. This spruce is a rapid grower and is often used as a lawn fence between village or city lots. Norway Spruce can be planted most effectively in groups on the lawn, imitating nature, planting without any particular order, but far enough apart to give each tree an opportunity to expand itself in its beauty.

GENERAL JACQUEMINOT

General Jacqueminot. Brilliant crimson; large and fine. Beautiful in bud and a universal favorite.

Baby Rambler. A dwarf (bush) form of Crimson Rambler, and furthermore, Everblooming. Will bloom continuously throughout the summer if planted out-of-doors.

La France. Rich satiny peach, changing to deep rose; large and full. A constant bloomer. The sweetest of all.

Magna Charta. Pink and carmine; very large and full; a profuse bloomer. Fragrant. Free grower.

Paul Neyron. The largest of all. Deep rose color. A free bloomer and vigorous grower.

Mad. Plantier. Pure white, large and very double. A free bloomer and grower.

Prince Camille de Rohan. Very dark velvety crimson, changing to intense maroon.

Climbing Roses

Crimson Rambler. New. Of Japan origin. Very vigorous, growing eight to ten feet a season after it is well established. Entirely hardy and extremely prolific. It blooms in clusters. Of a beautiful crimson color and lasts a long time. It is a jewel.

Baltimore Belle. Pale blush, nearly white. Bloom in clusters.

Prairie Queen. Bright, rosy red. Very large and fine.

Dorothy Perkins. A most valuable Pink Rambler Rose. Of a most beautiful shell-pink color. In hardness, nothing more could be desired. Flowers are very double of large size, usually two inches across and borne in loose clusters.

Margaret Dickson. New, perfectly hardy and very vigorous. A free summer and autumn bloomer. Flowers white with pale flesh center, of a waxy texture and delightful fragrance.

Clio. New. The perfection in Hybrid Perpetuals. Of delicate satin blush with a little deeper center. Large, well shaped and very double. Strong, robust, hardy and prolific. A jewel.

Blanche Robert. Pure white, large and full, buds very beautiful. A strong grower and a desirable variety.

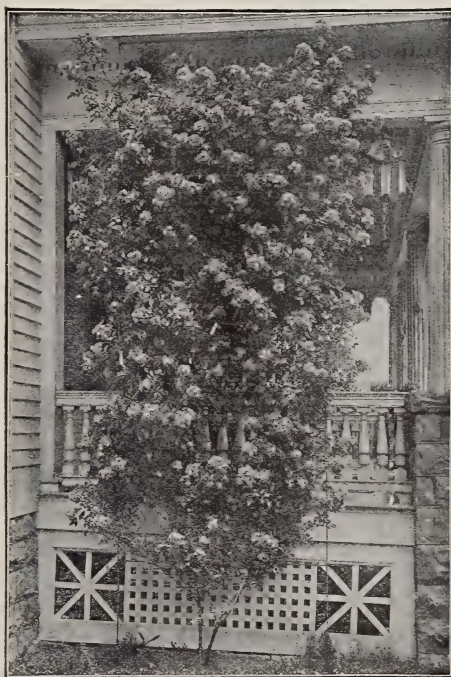

Marshall P. Wilder. Bright cherry carmine; very fragrant and one of the freest bloomers; vigorous.

Baron de Bonstetten. Flowers large and very double; color rich, dark red, passing to deep velvety maroon. Very fragrant.

Coquette des Alps. White, slightly shaded with carmine; strong grower and a great favorite. This variety is very valuable; it continues to give a profusion of blossoms for weeks after general varieties have finished.

Frau Karl Druschki (Snow Queen). A new rose of great merit. There is nothing in white roses quite as fine as this. Pure white large and of elegant form.

Mrs. Laing. Very free flowering; commences early and continues to bloom profusely until fall. Of delicate pink color. Very fragrant
